

Darcy / ID / Full-observation forward / sample 0

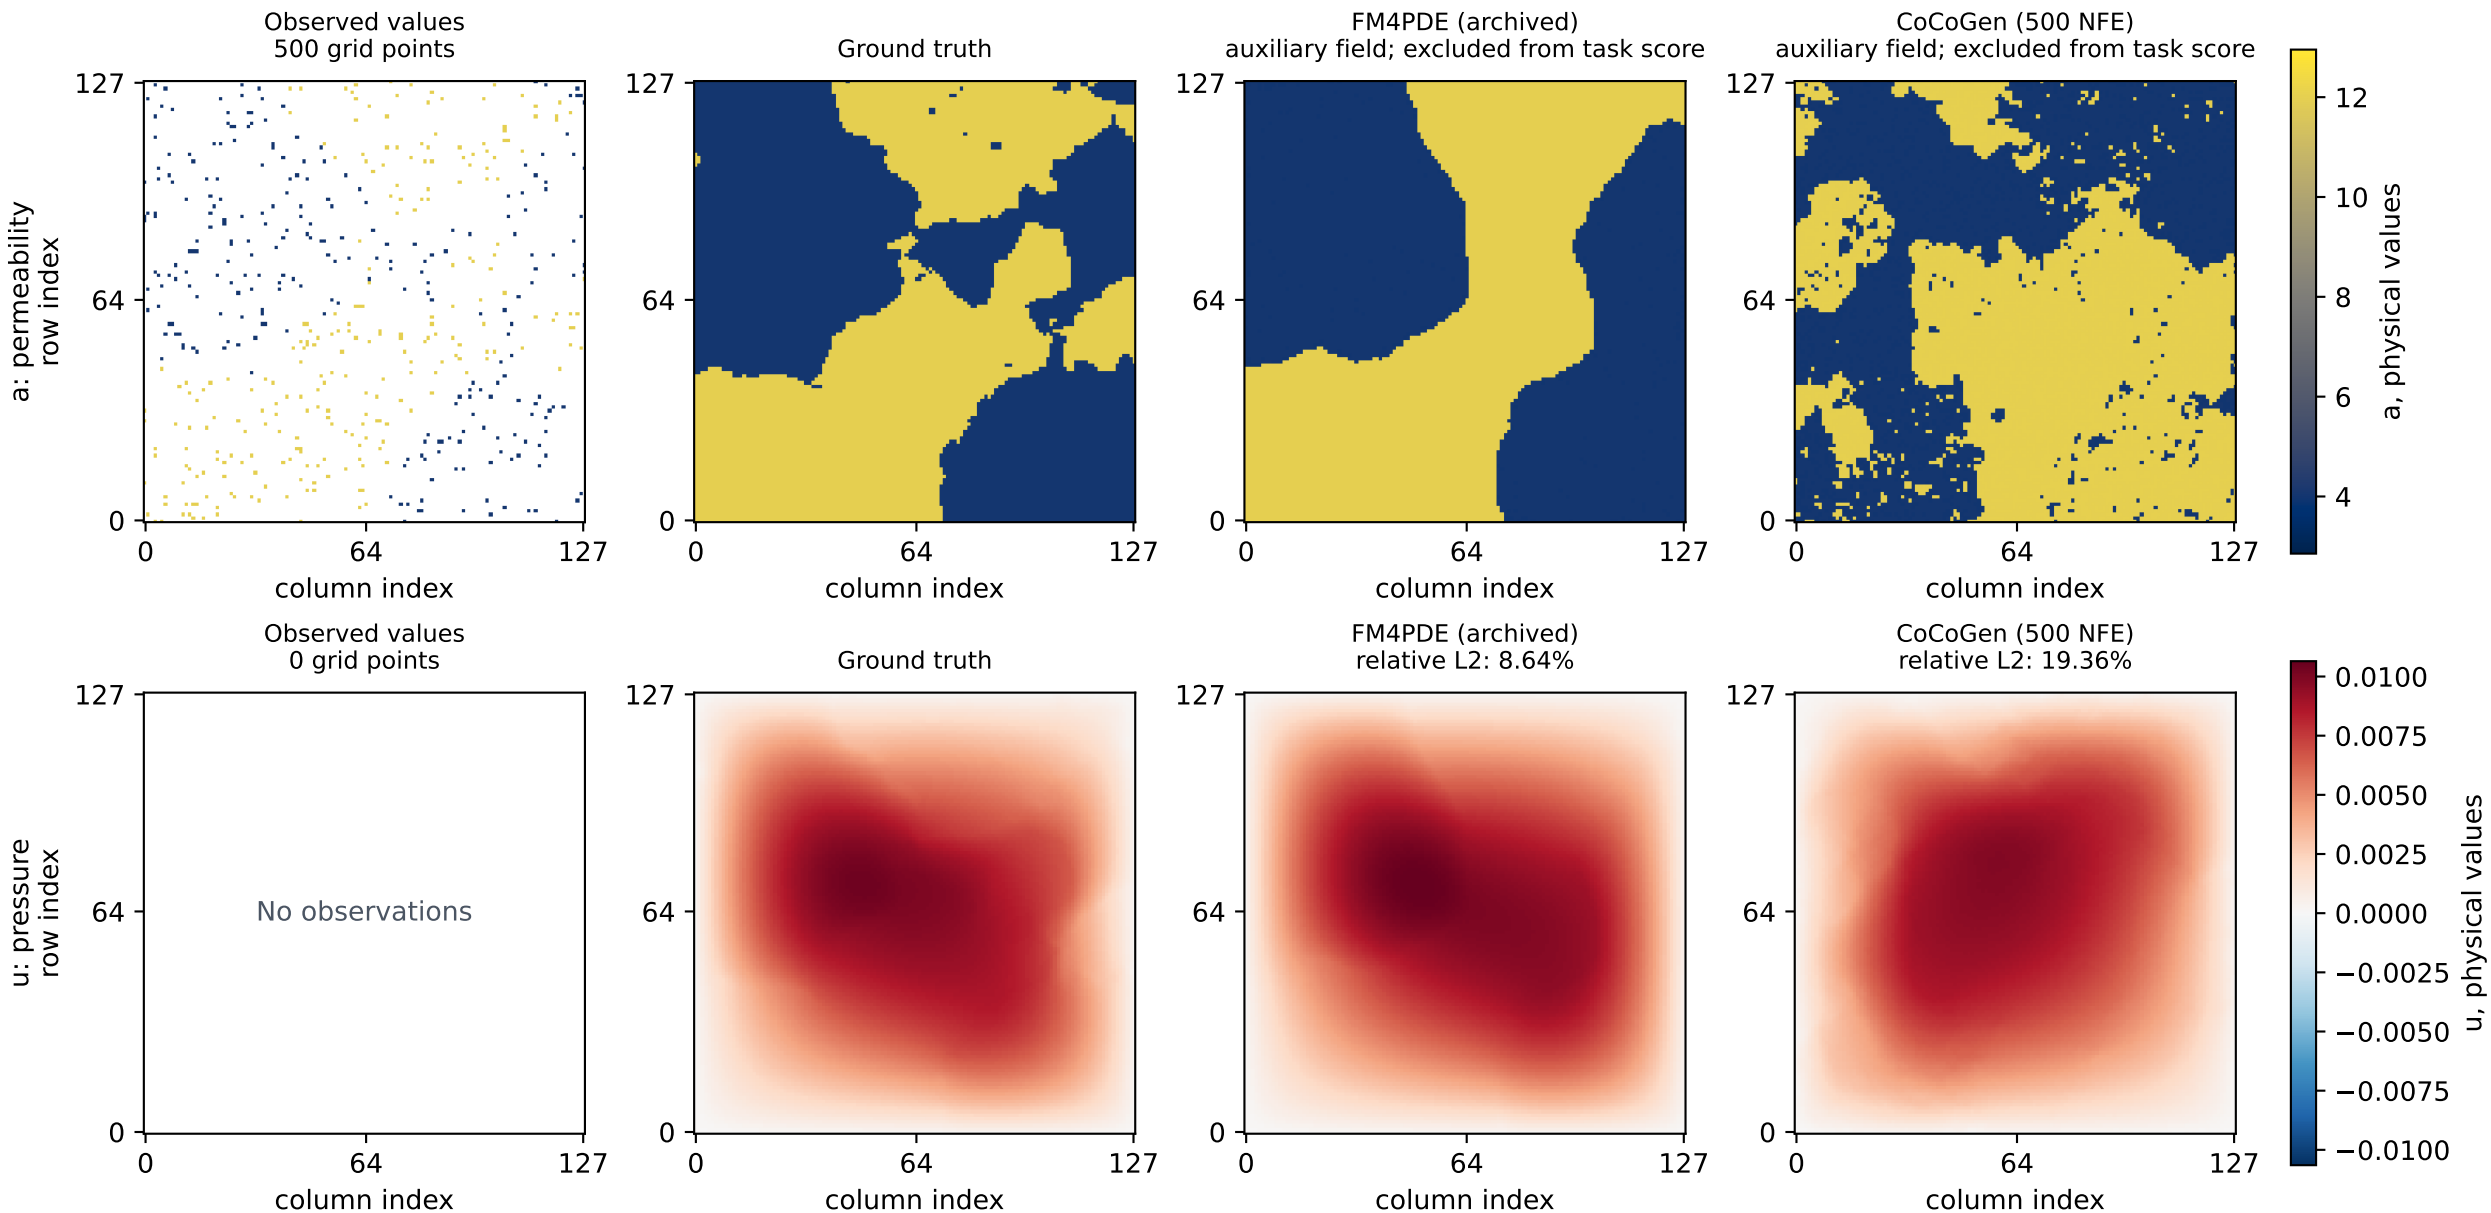

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Darcy / ID / Full-observation inverse / sample 0

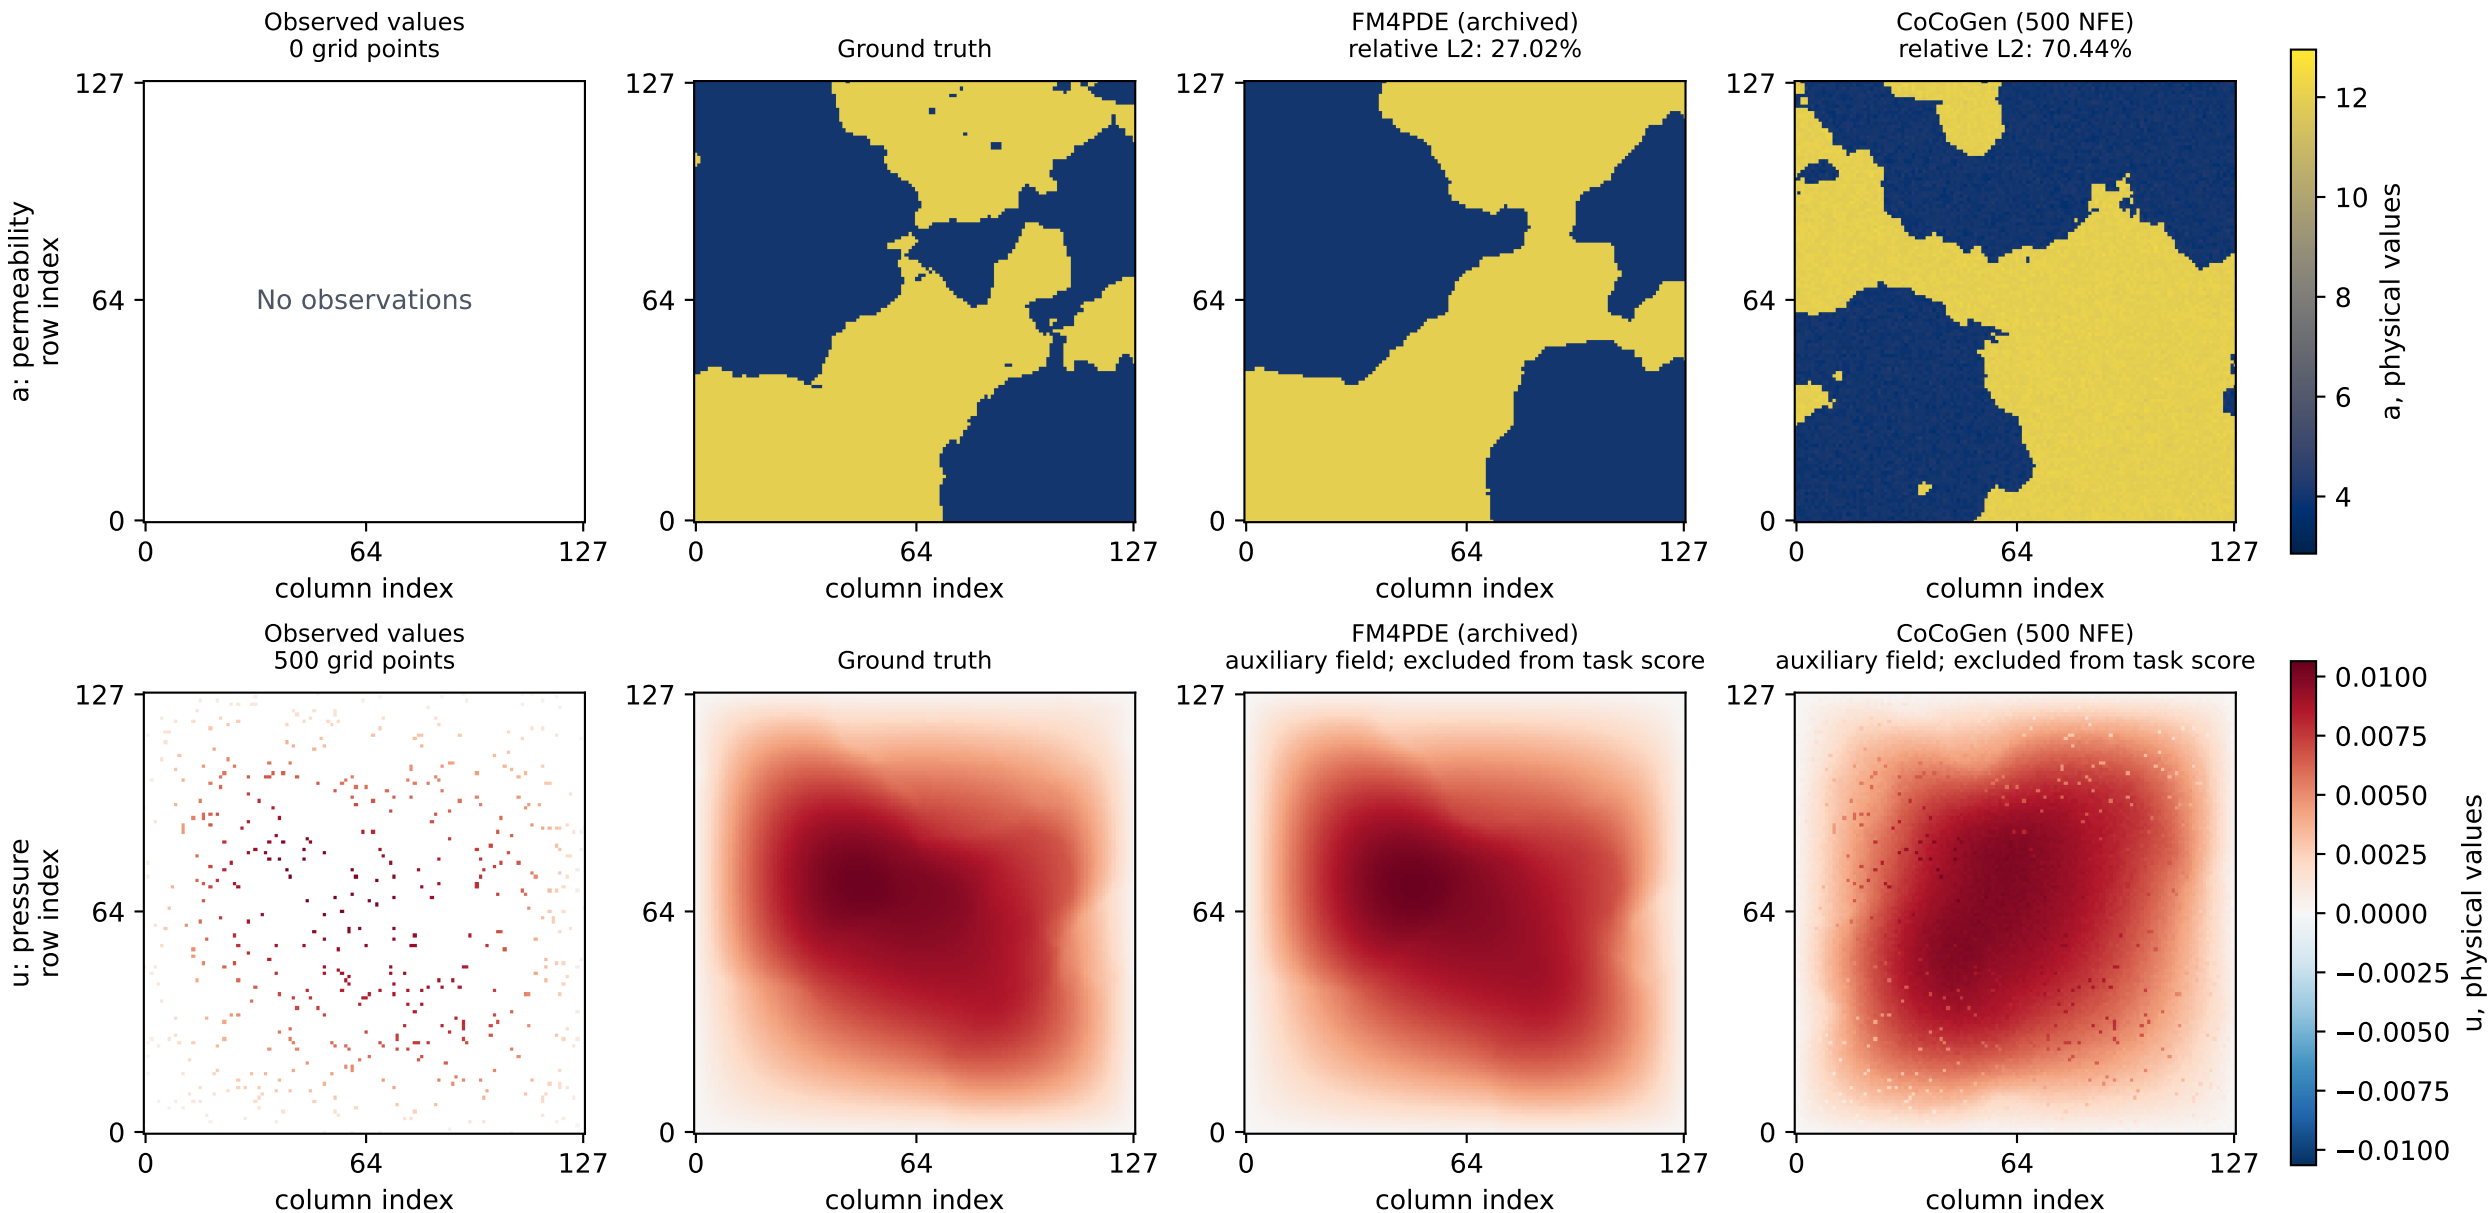

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Darcy / ID / Sparse forward / sample 0

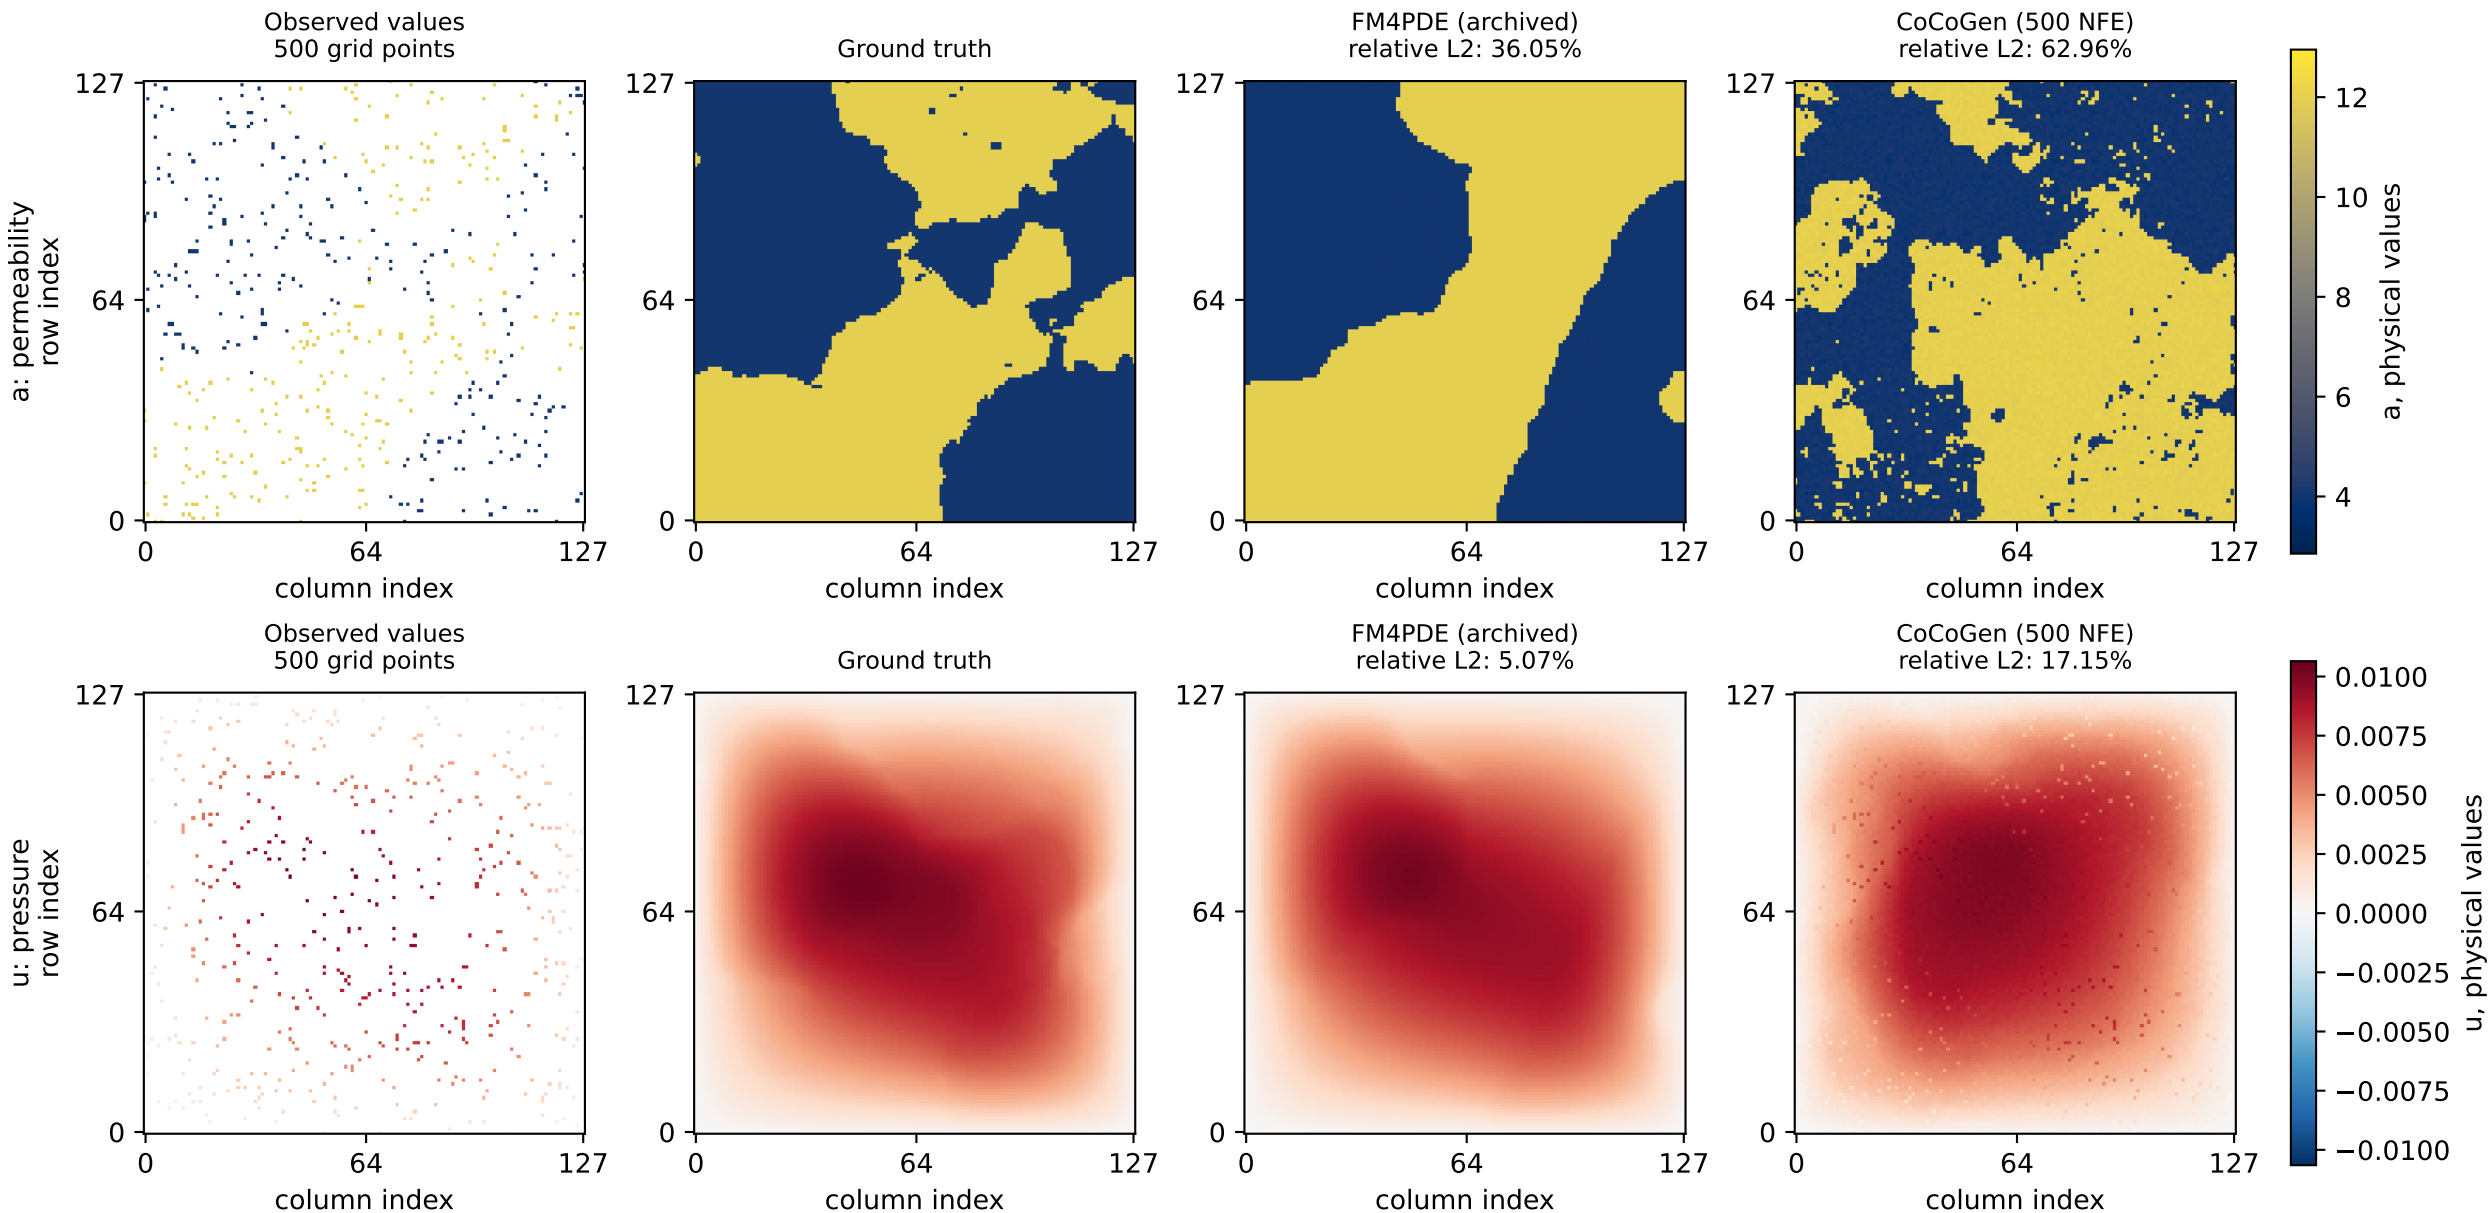

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Darcy / ID / Sparse inverse / sample 0

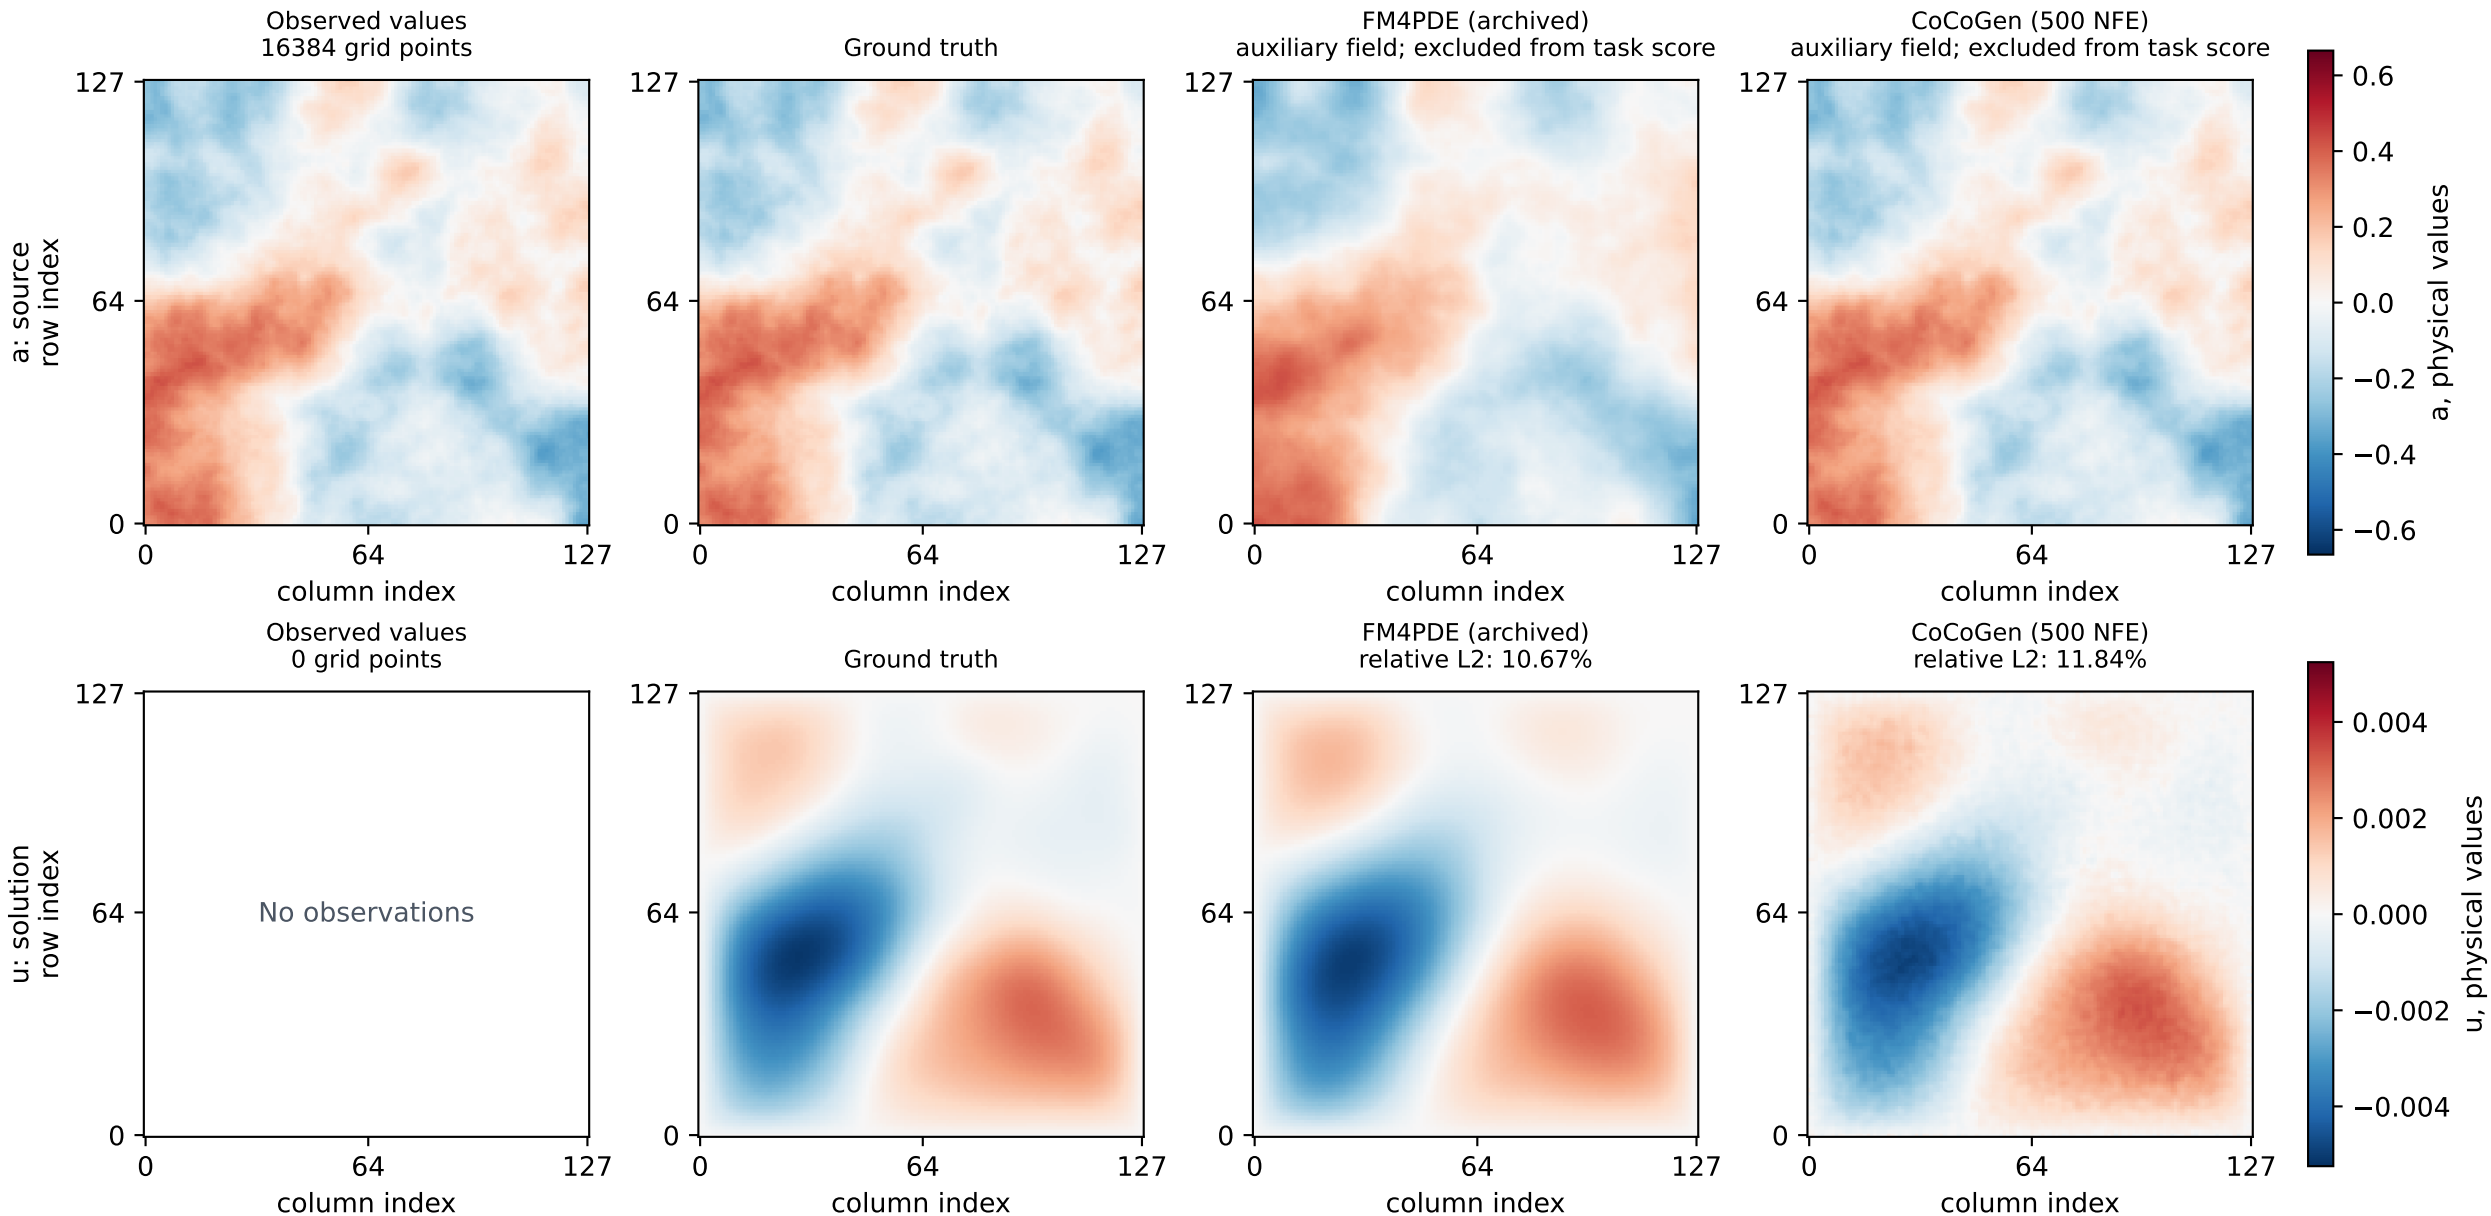

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Darcy / ID / Sparse joint reconstruction / sample 0

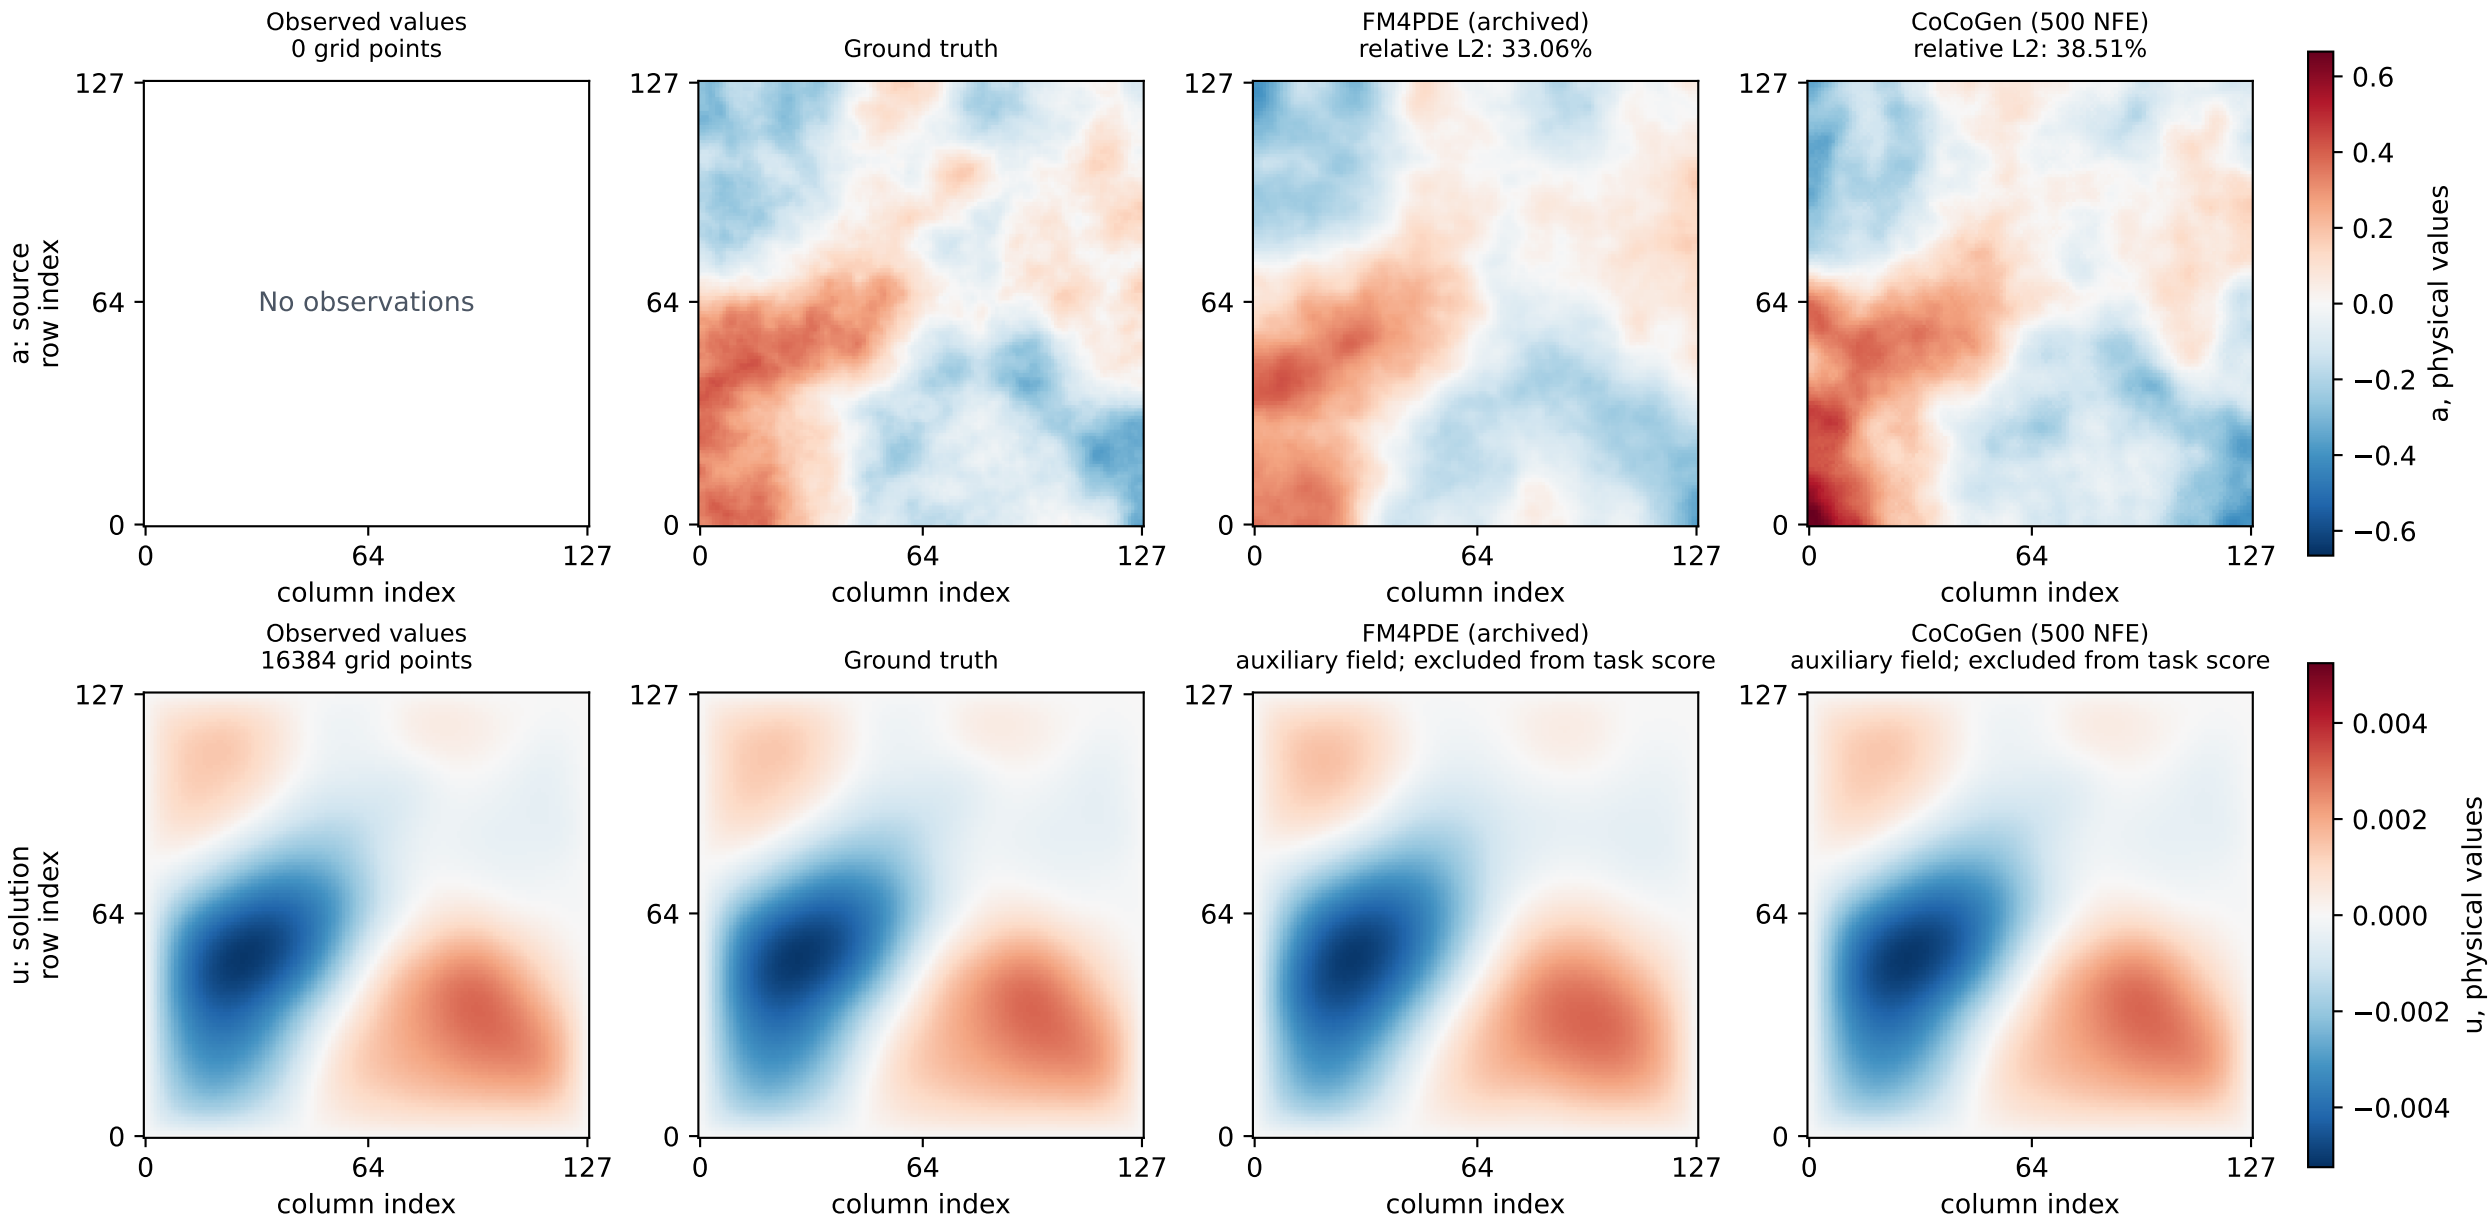

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Poisson / ID / Full-observation forward / sample 0

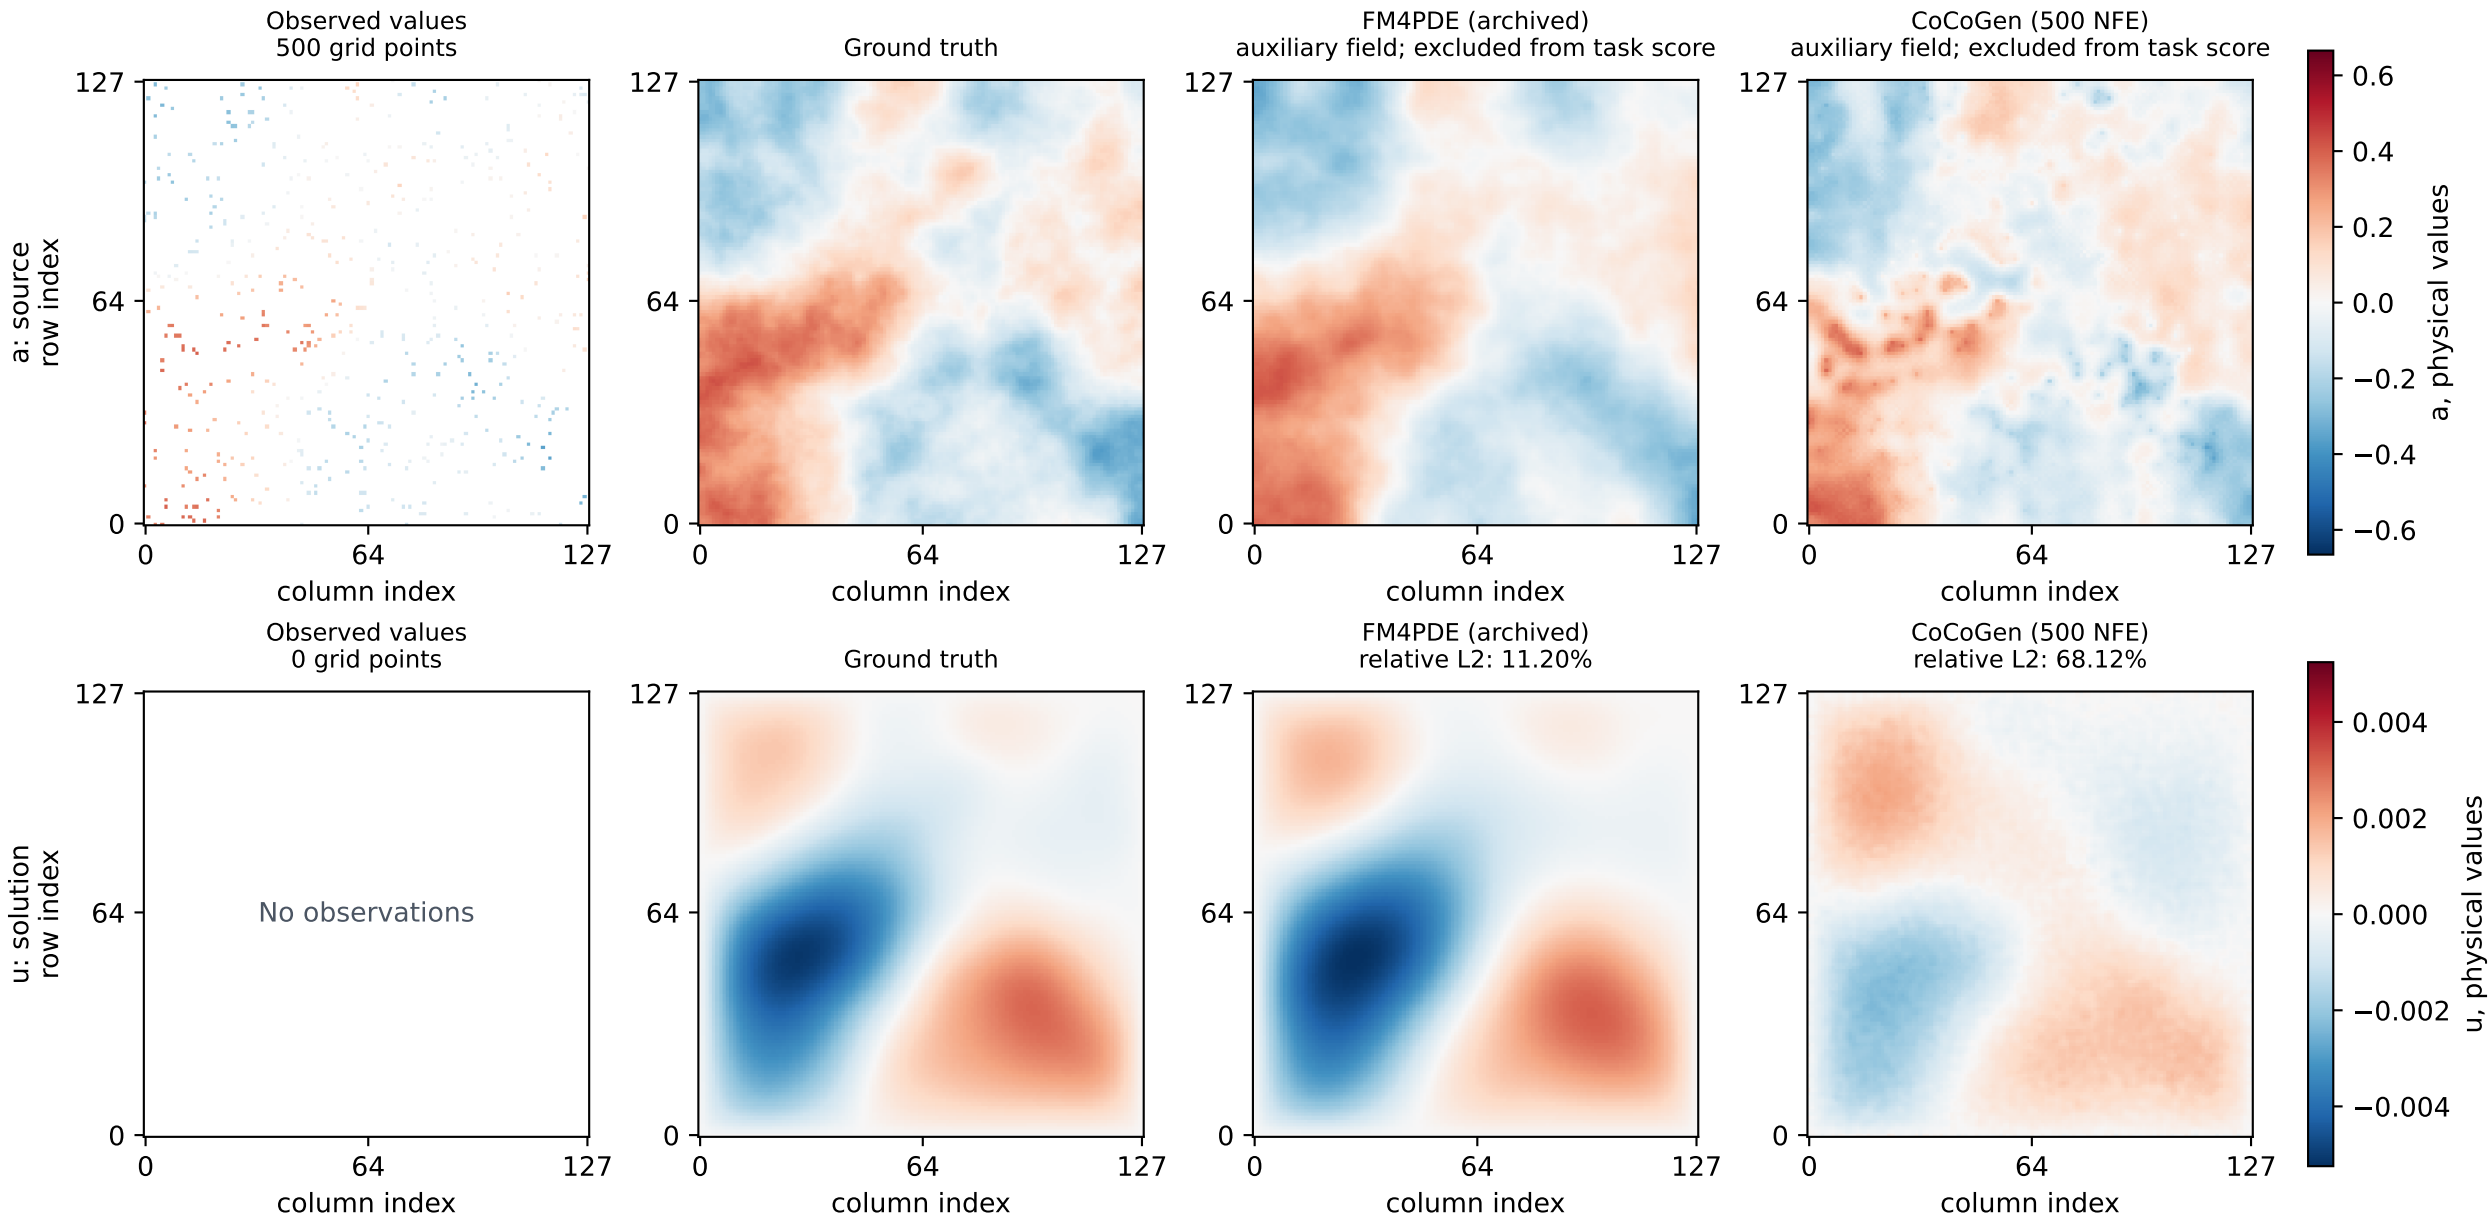

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Poisson / ID / Full-observation inverse / sample 0

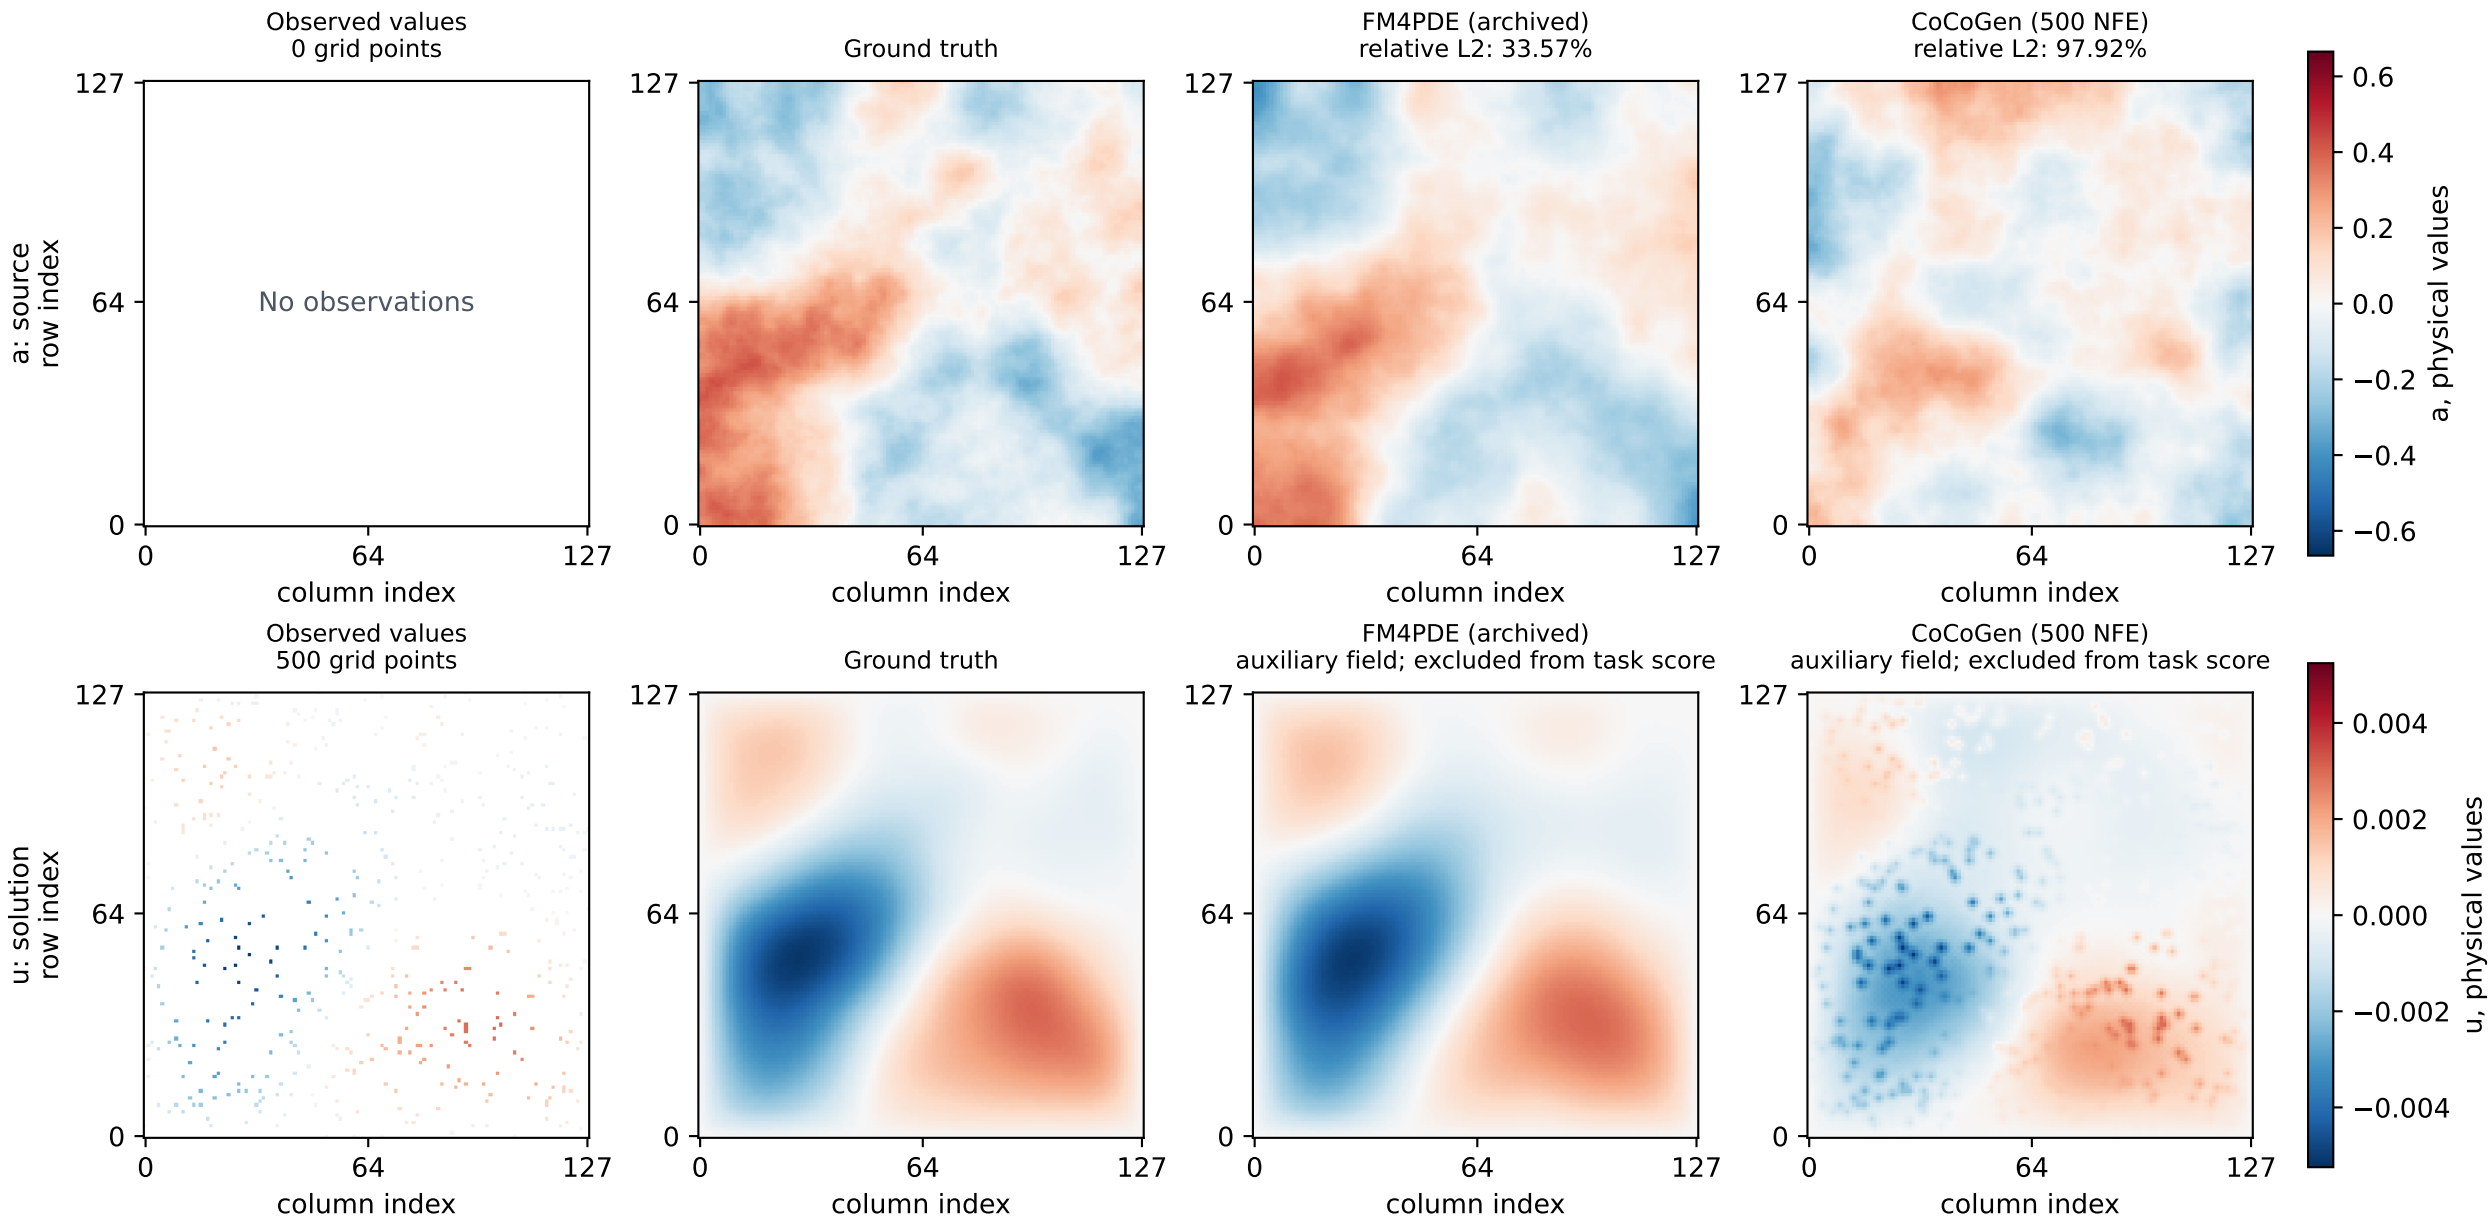

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Poisson / ID / Sparse forward / sample 0

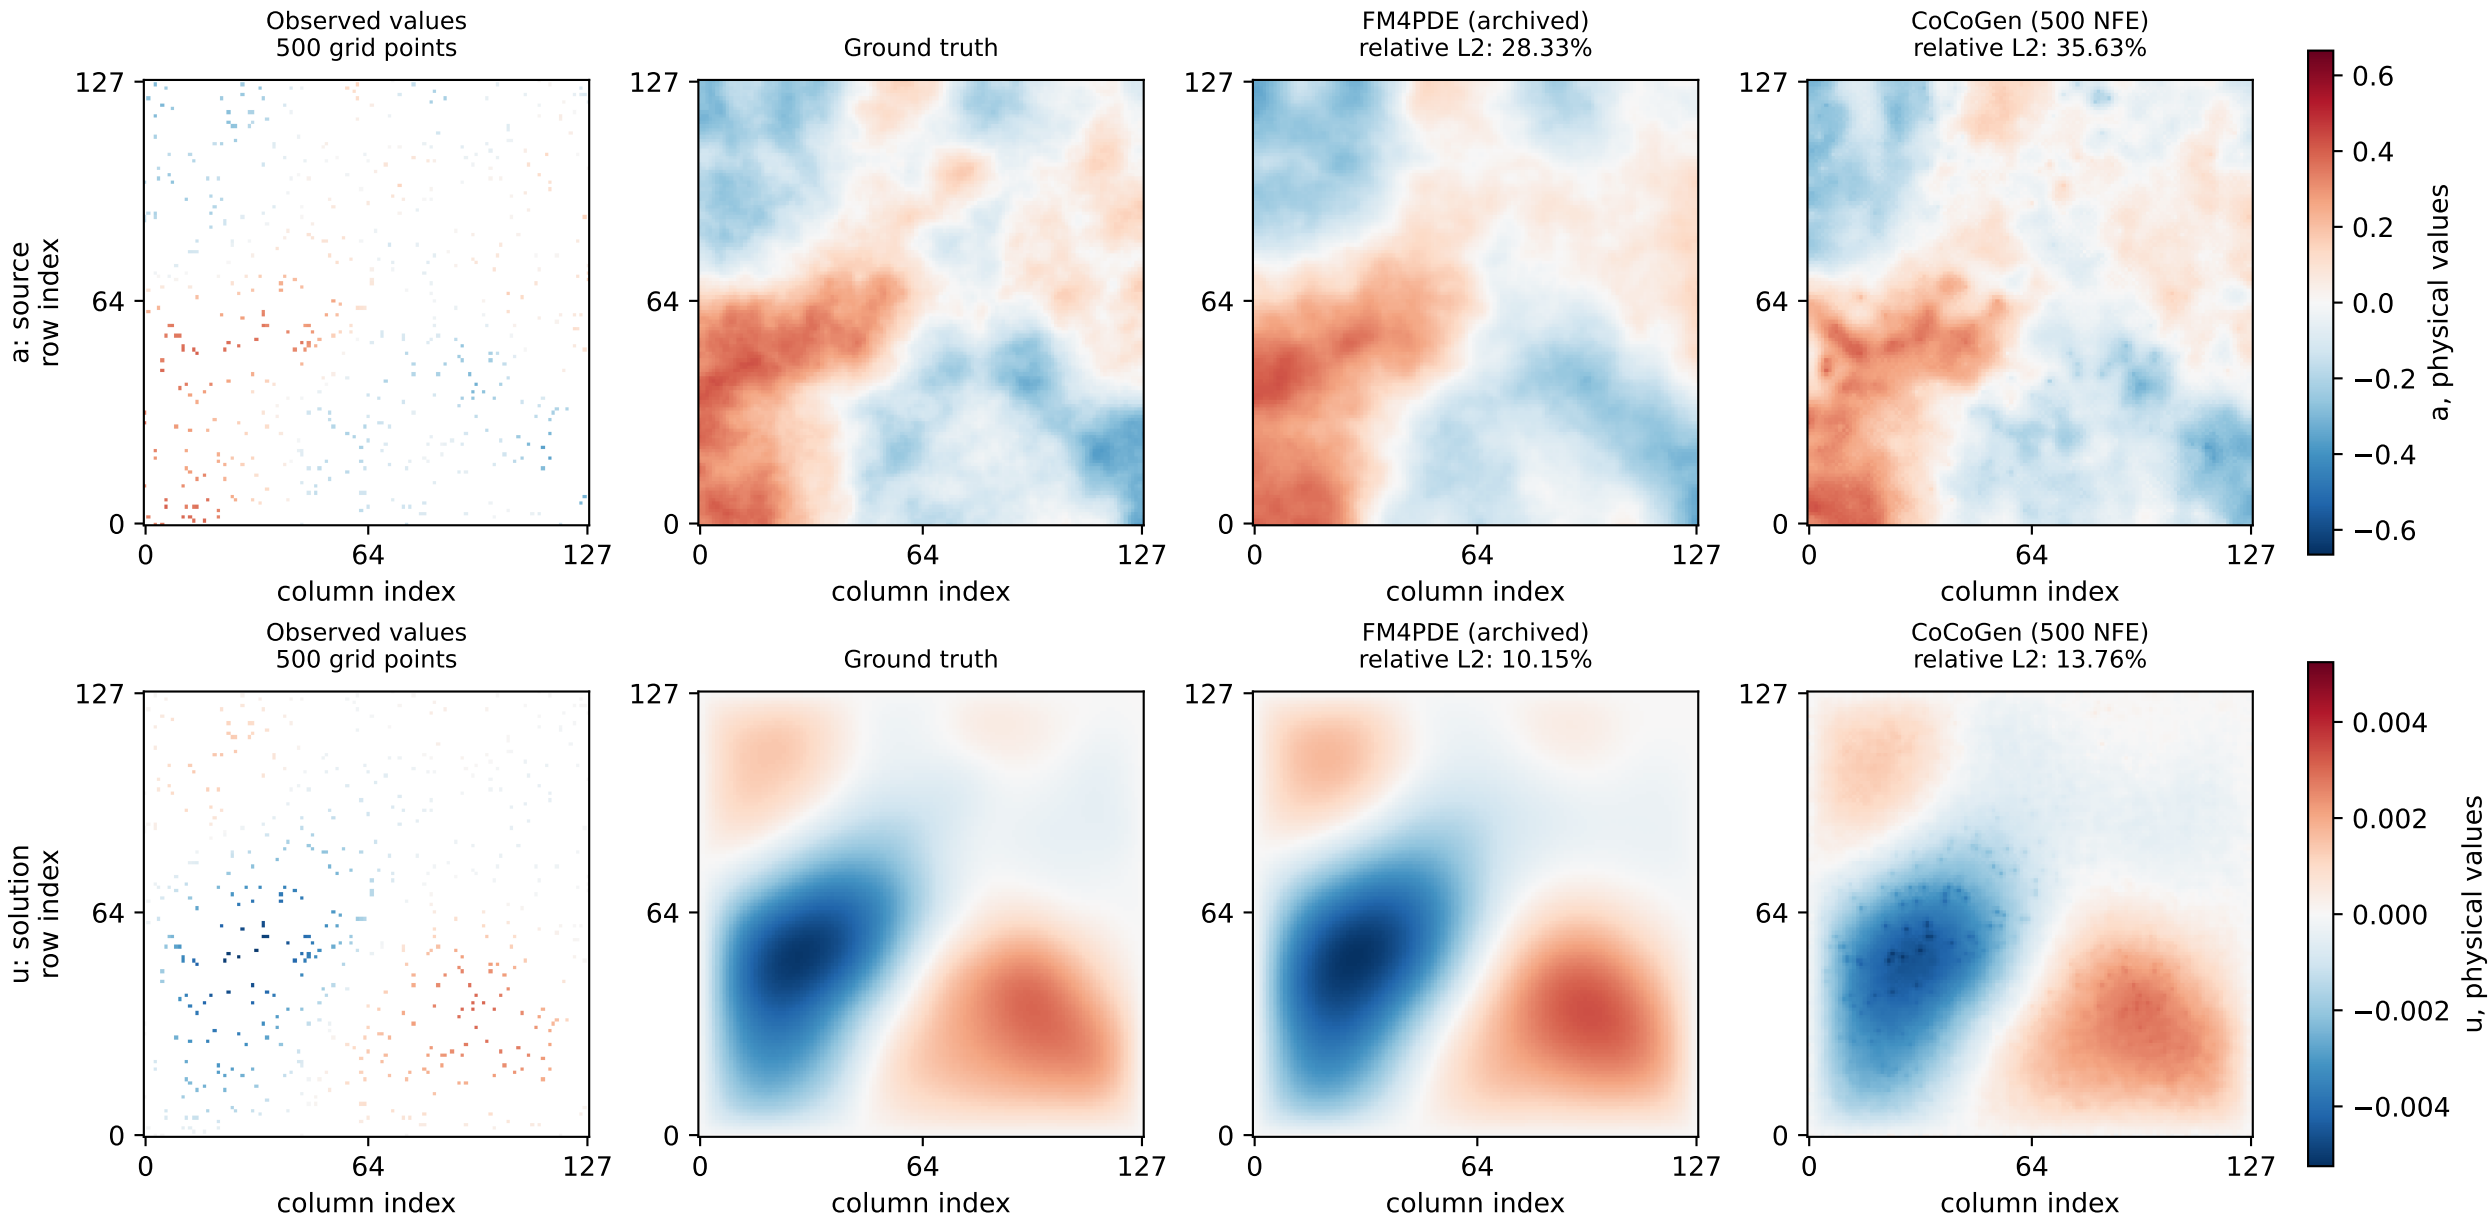

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Poisson / ID / Sparse inverse / sample 0

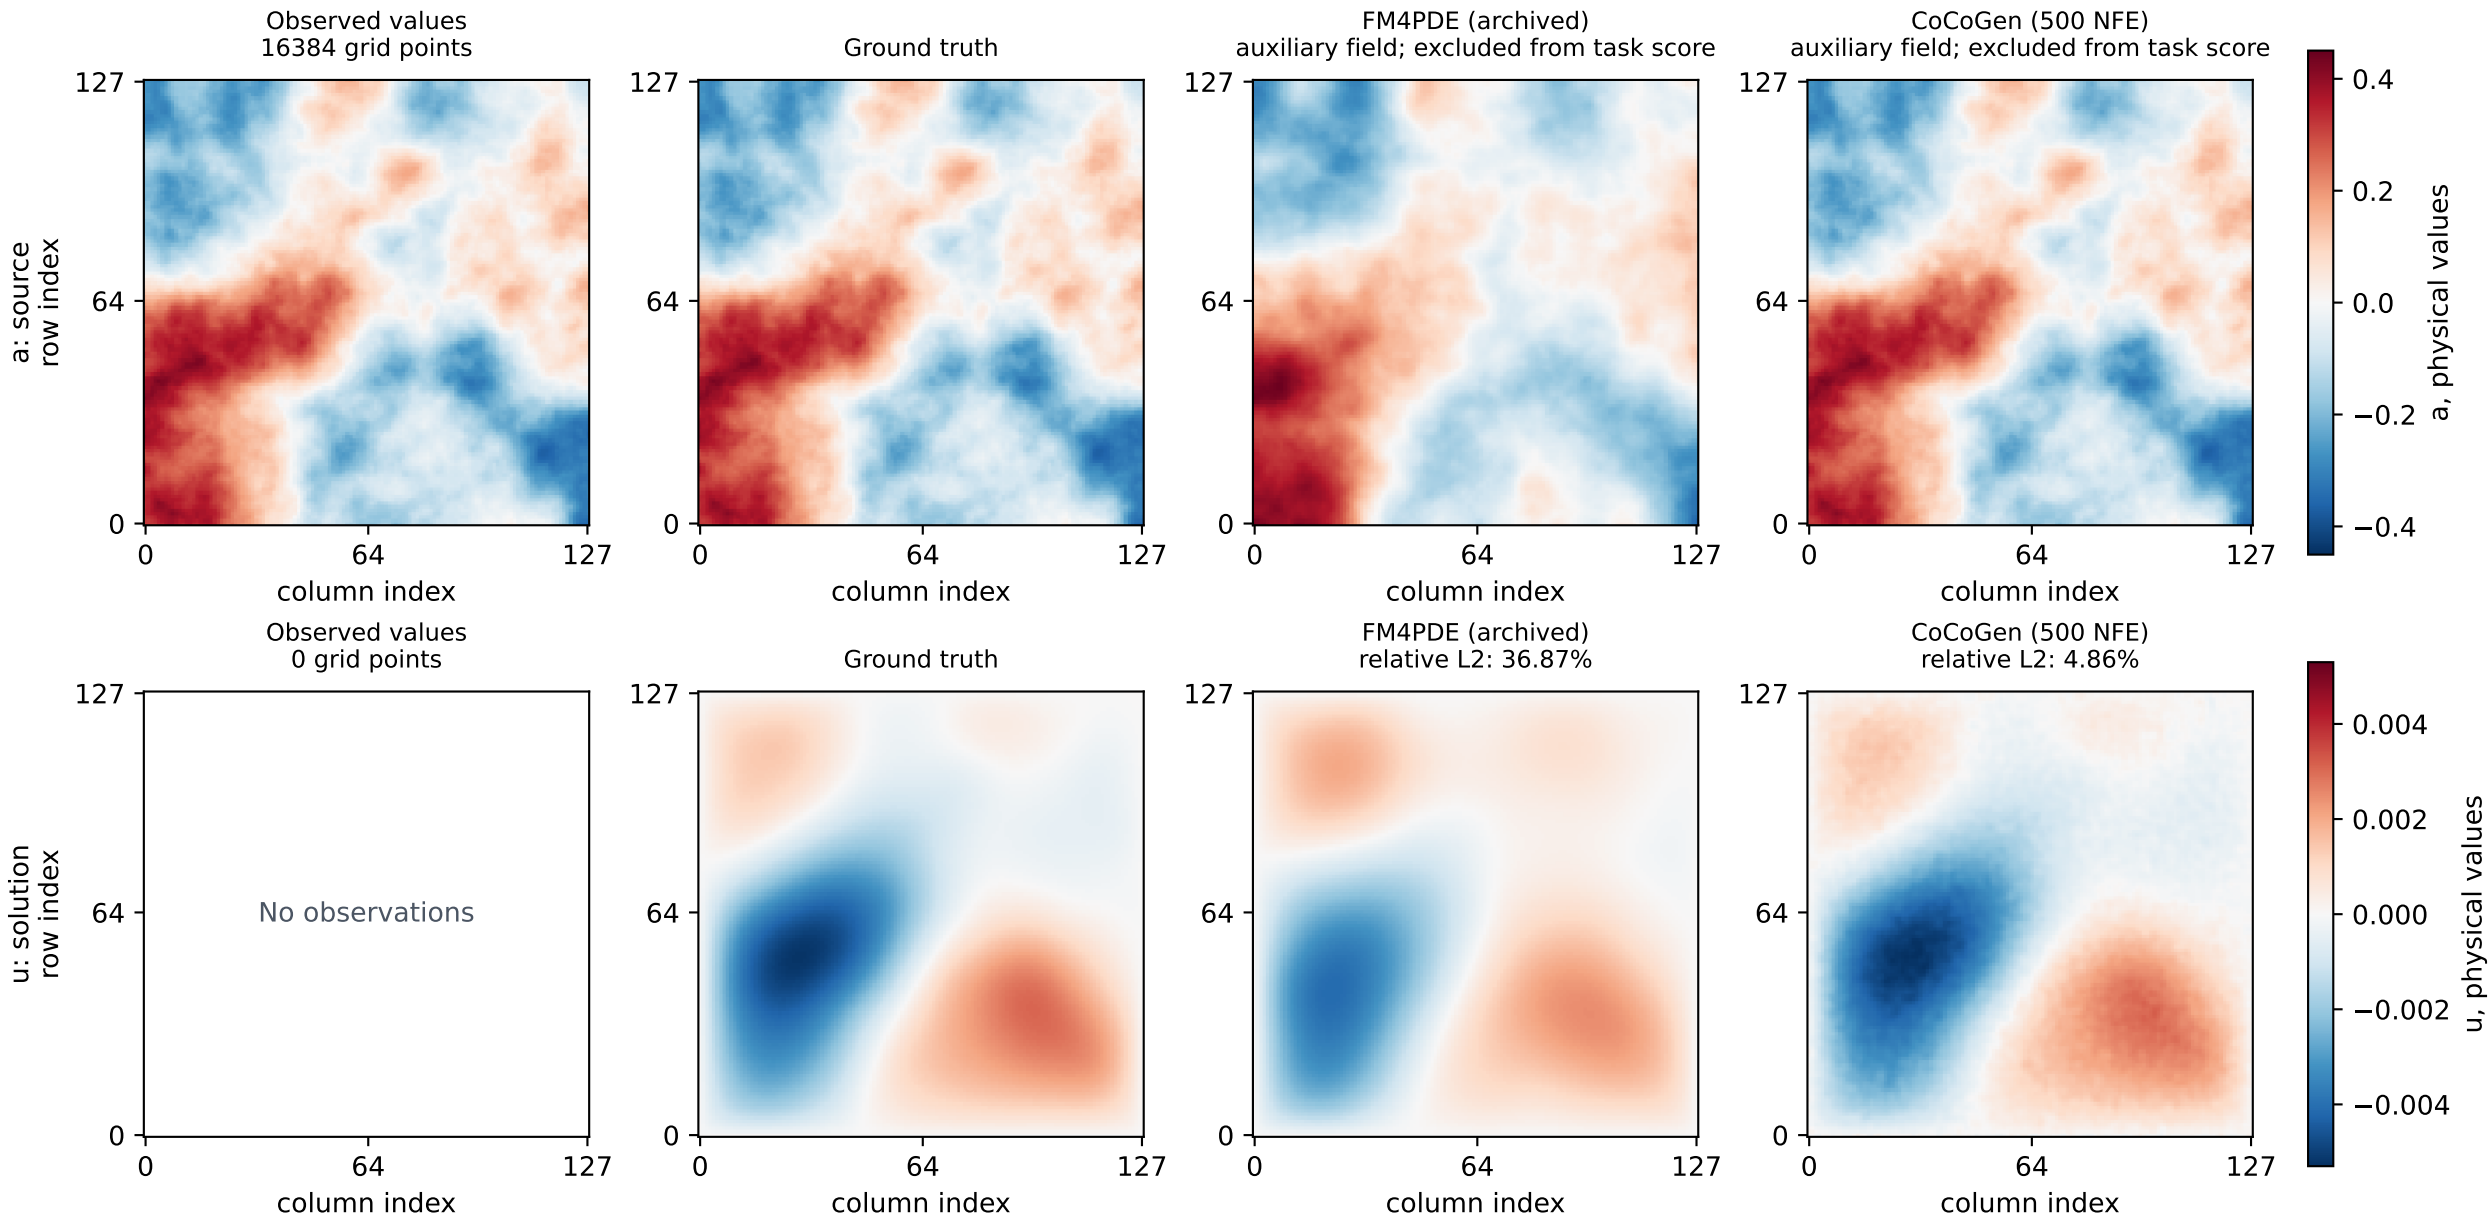

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Poisson / ID / Sparse joint reconstruction / sample 0

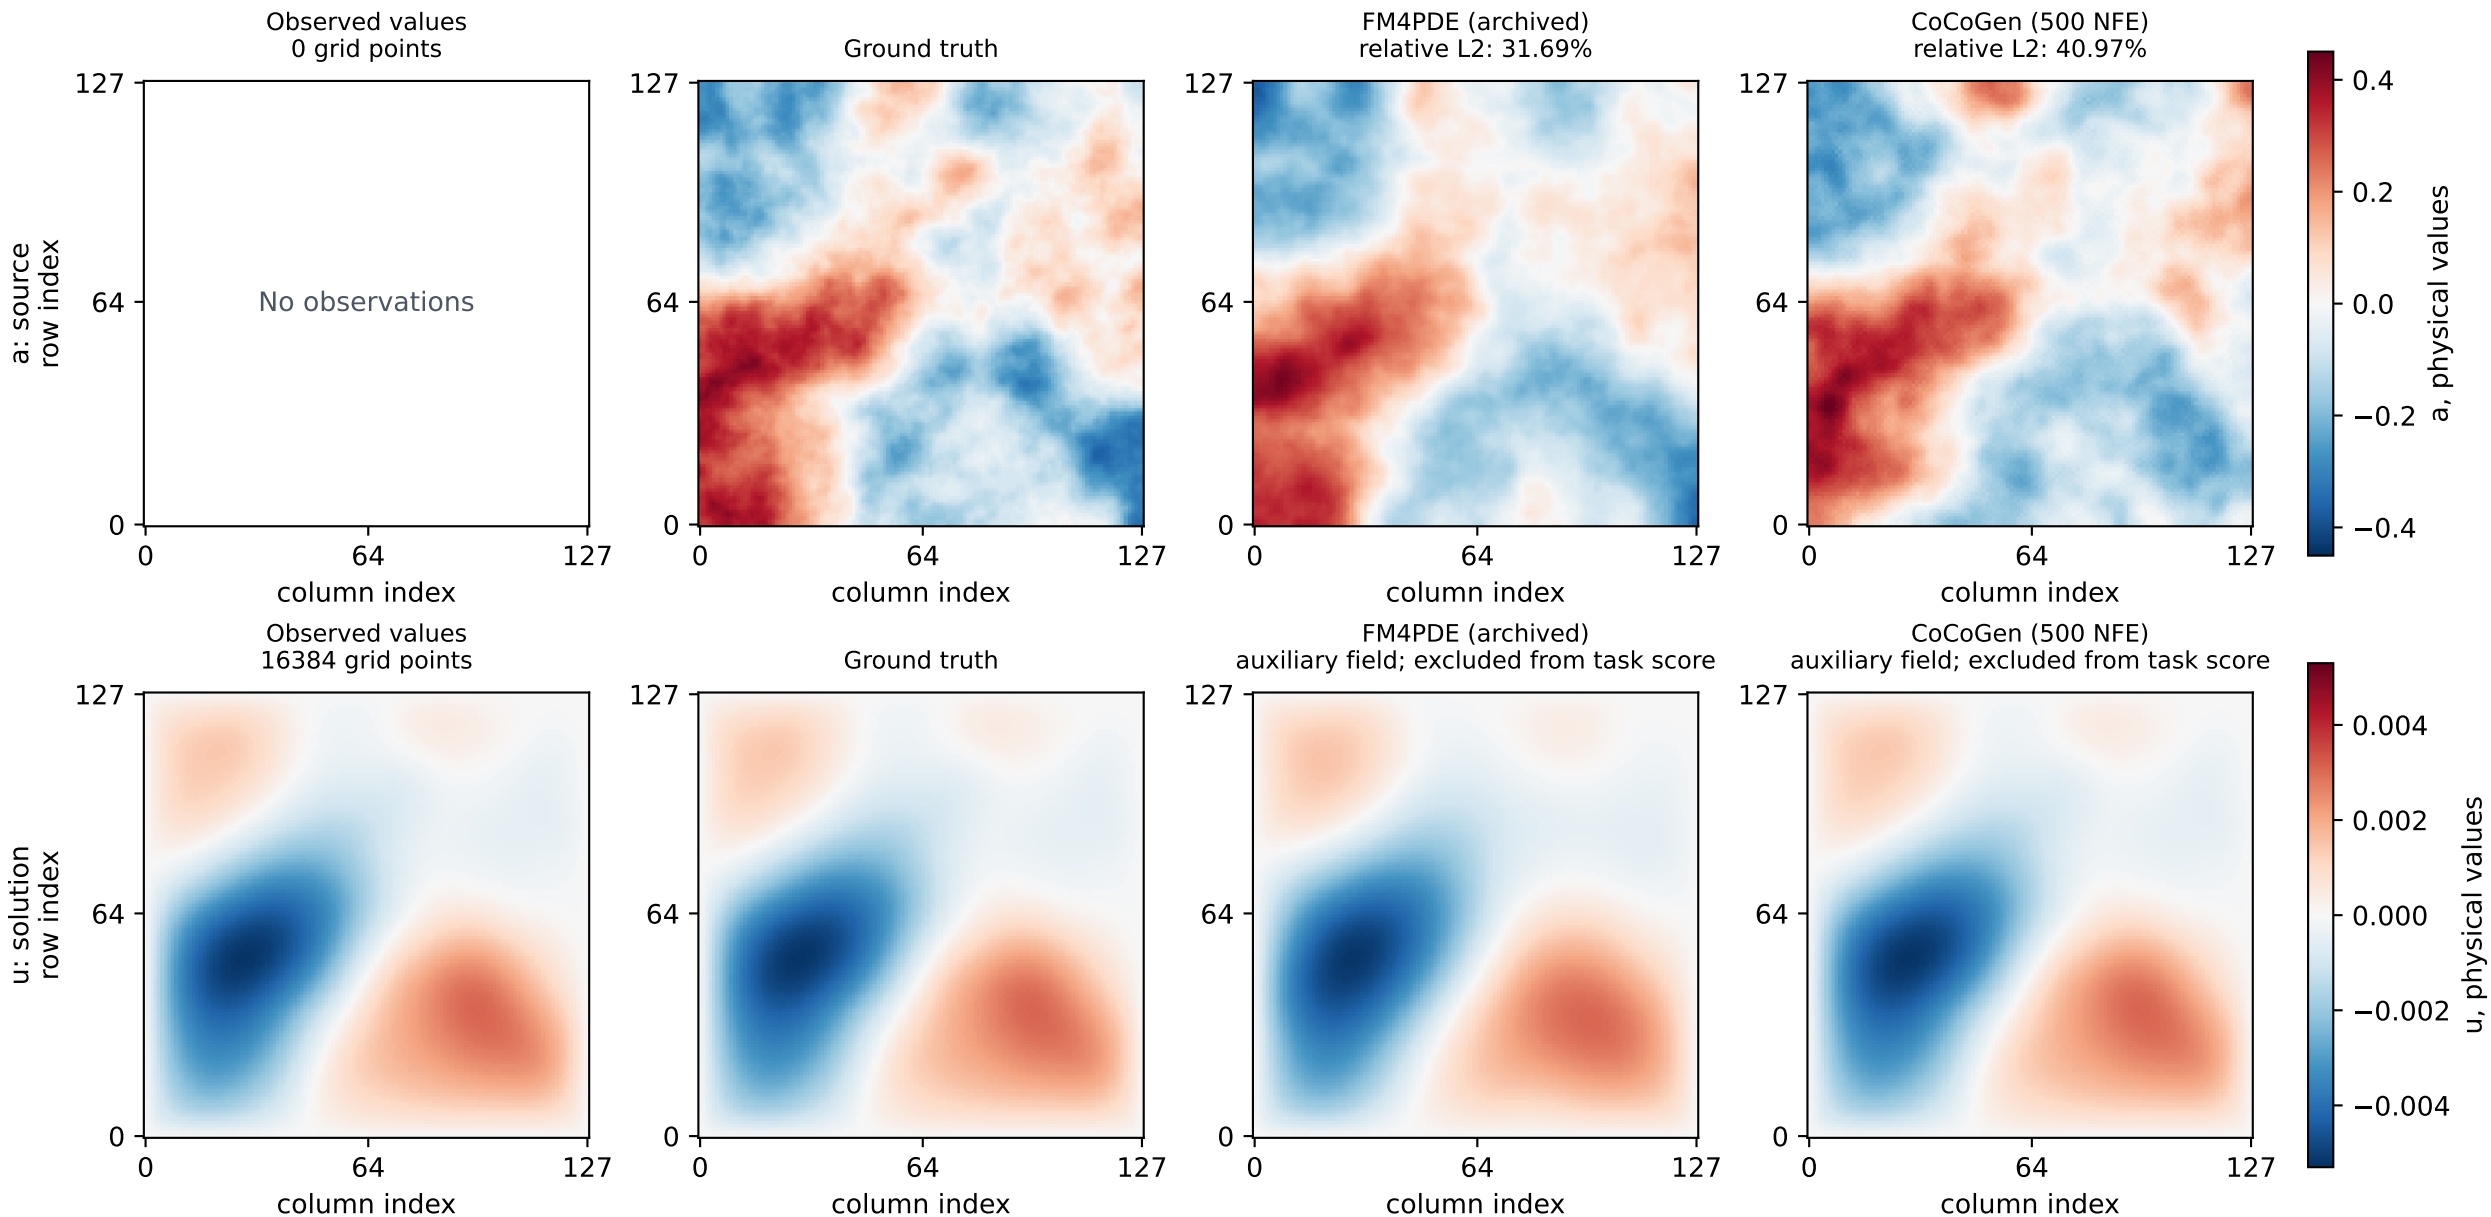

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Helmholtz / ID / Full-observation forward / sample 0

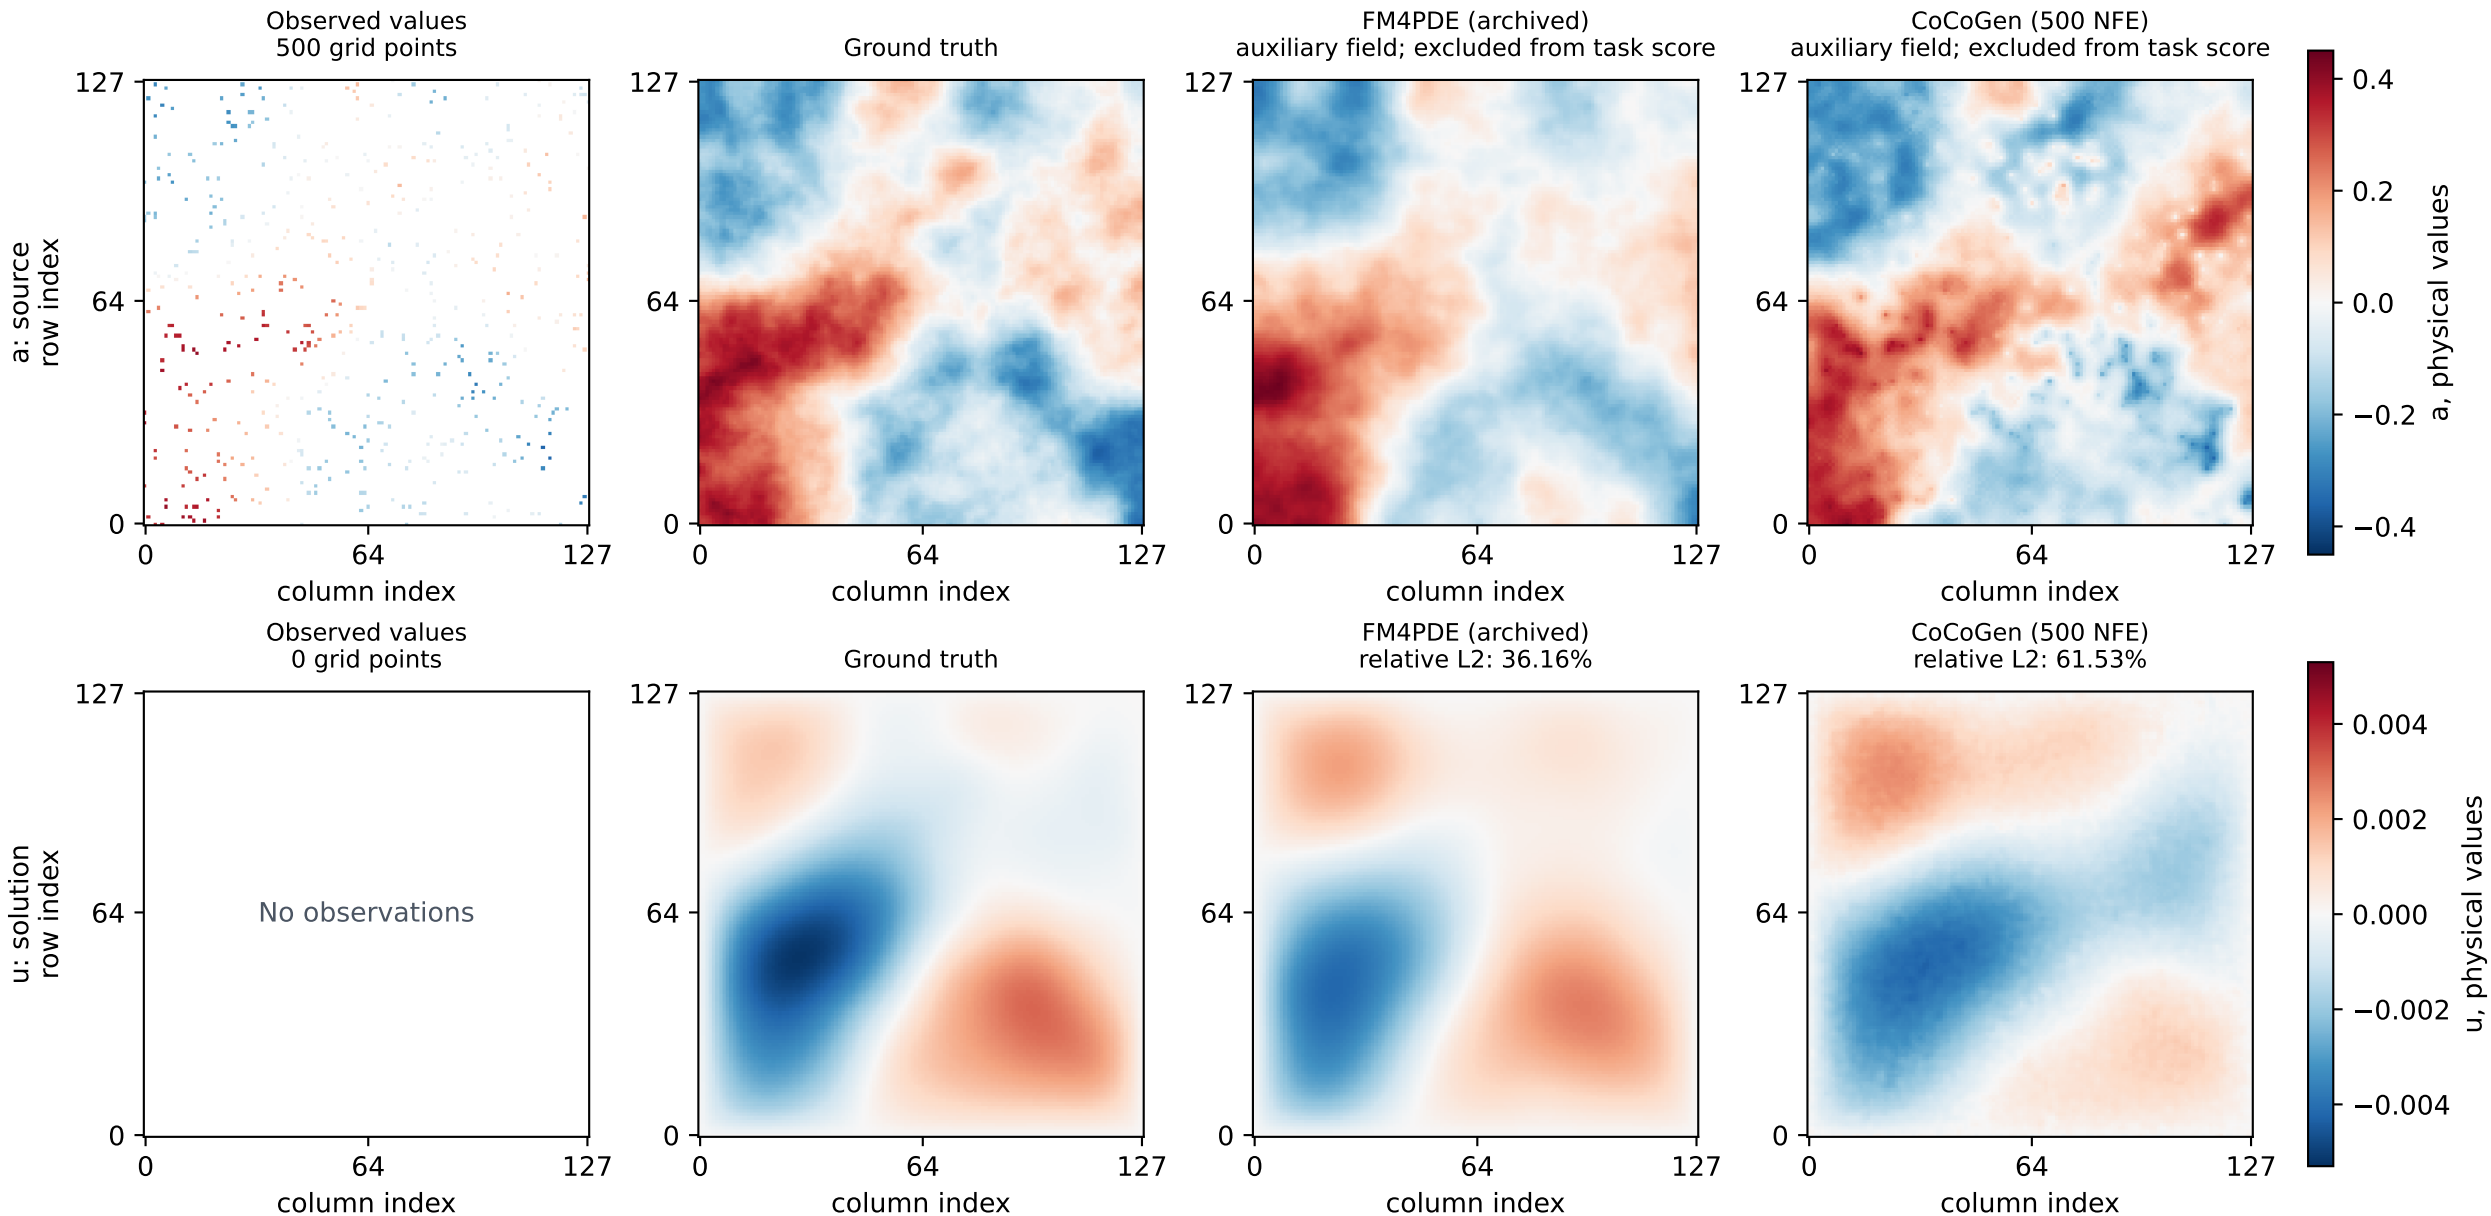

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Helmholtz / ID / Full-observation inverse / sample 0

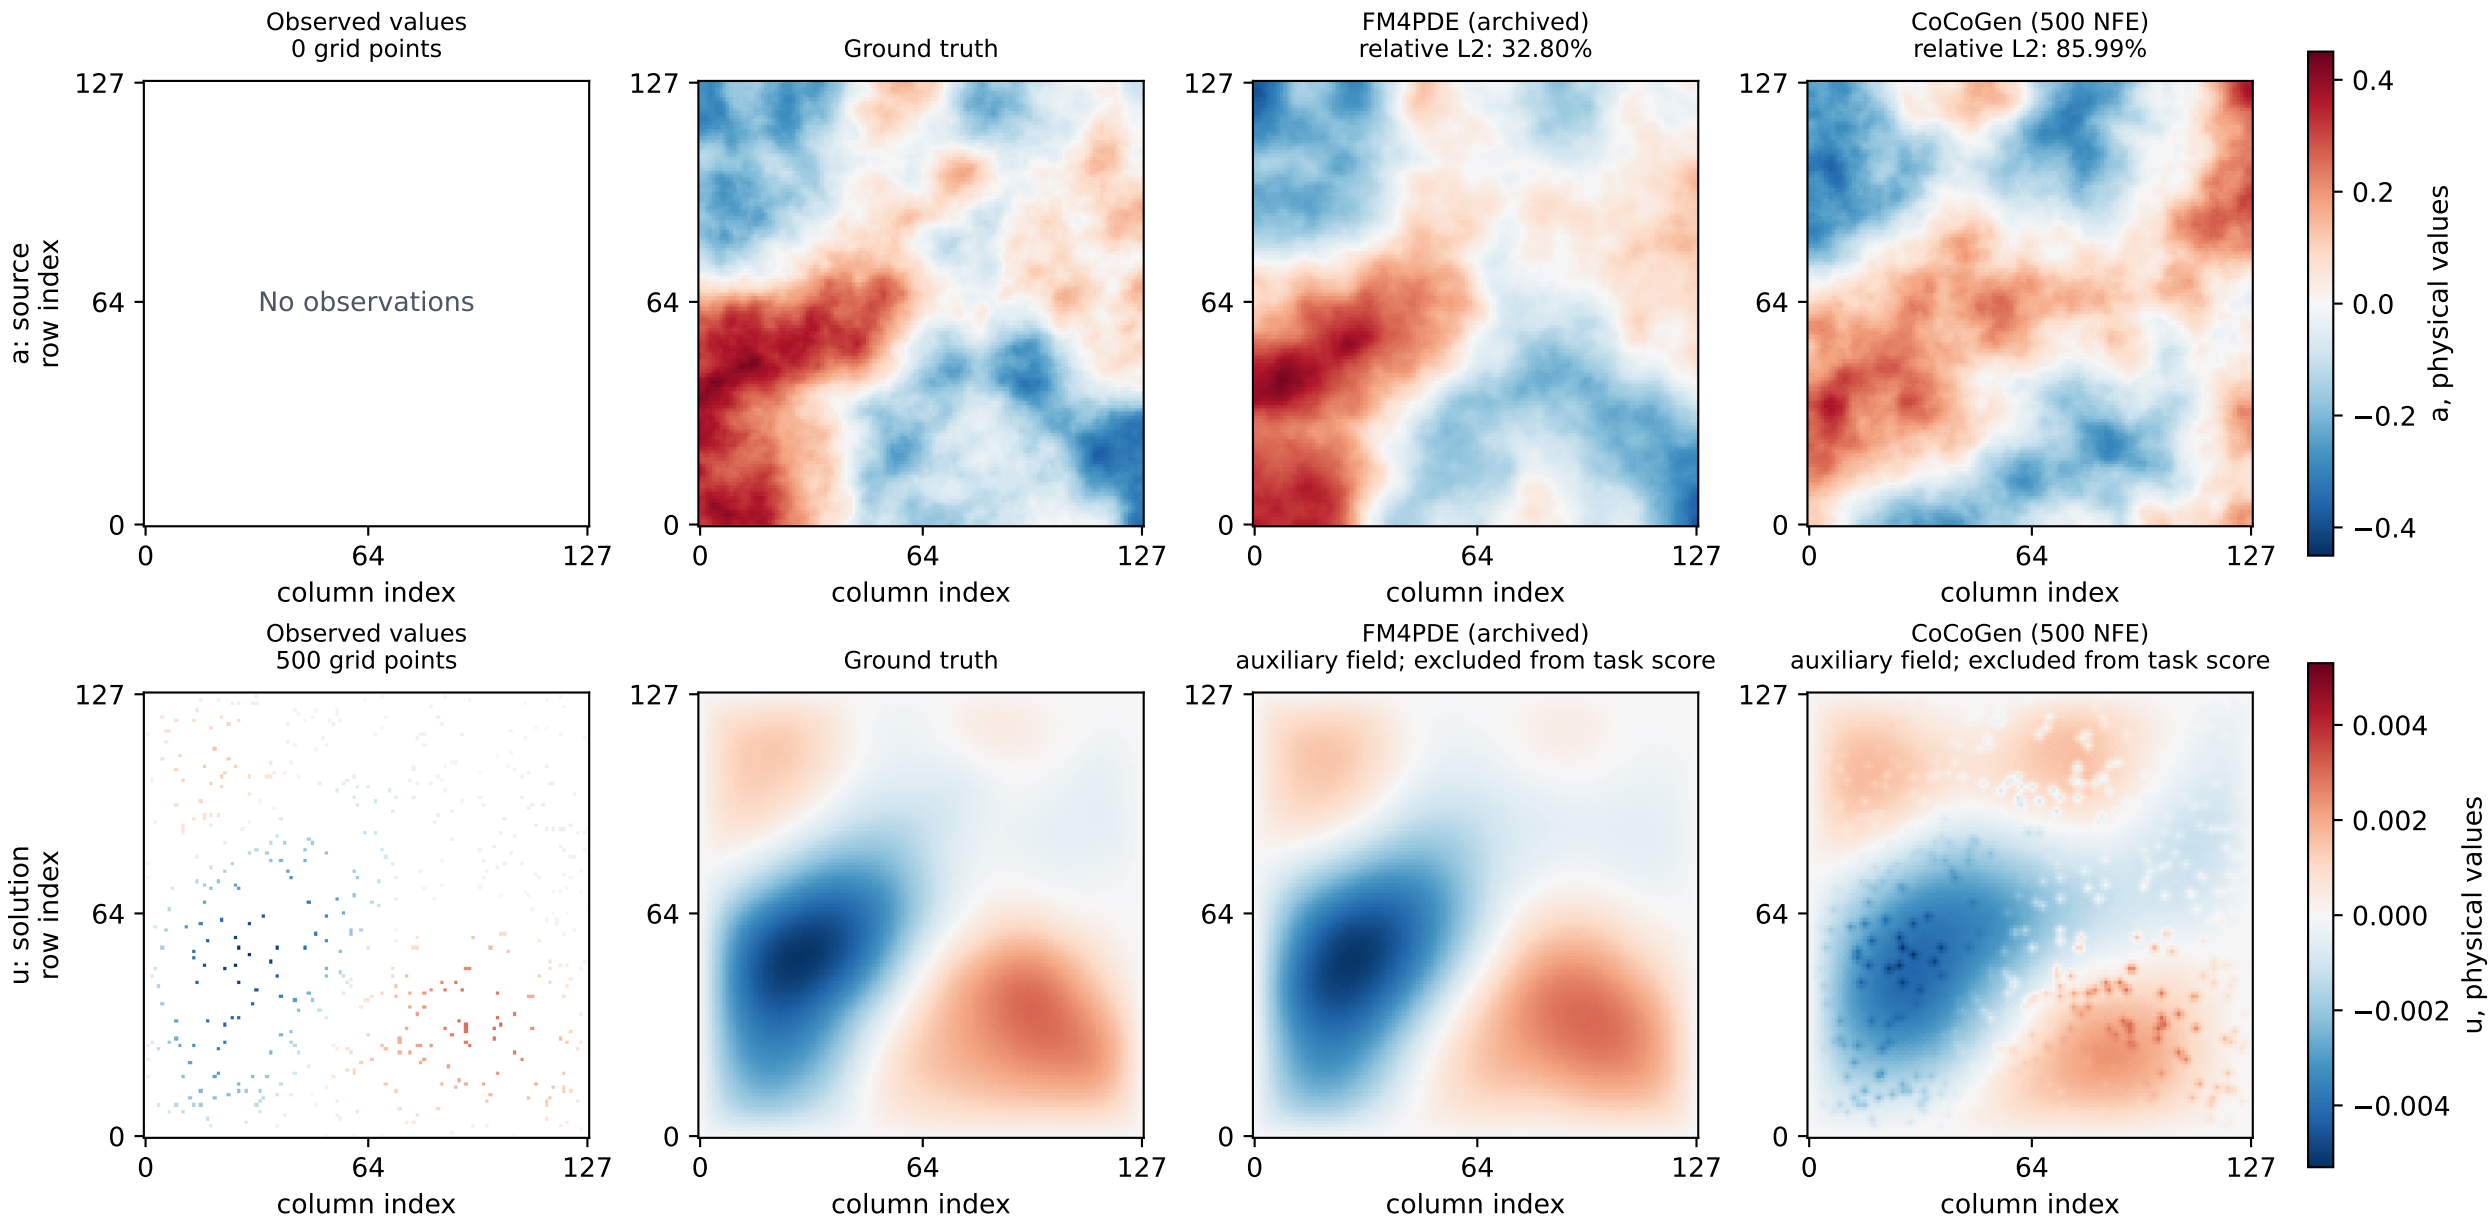

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Helmholtz / ID / Sparse forward / sample 0

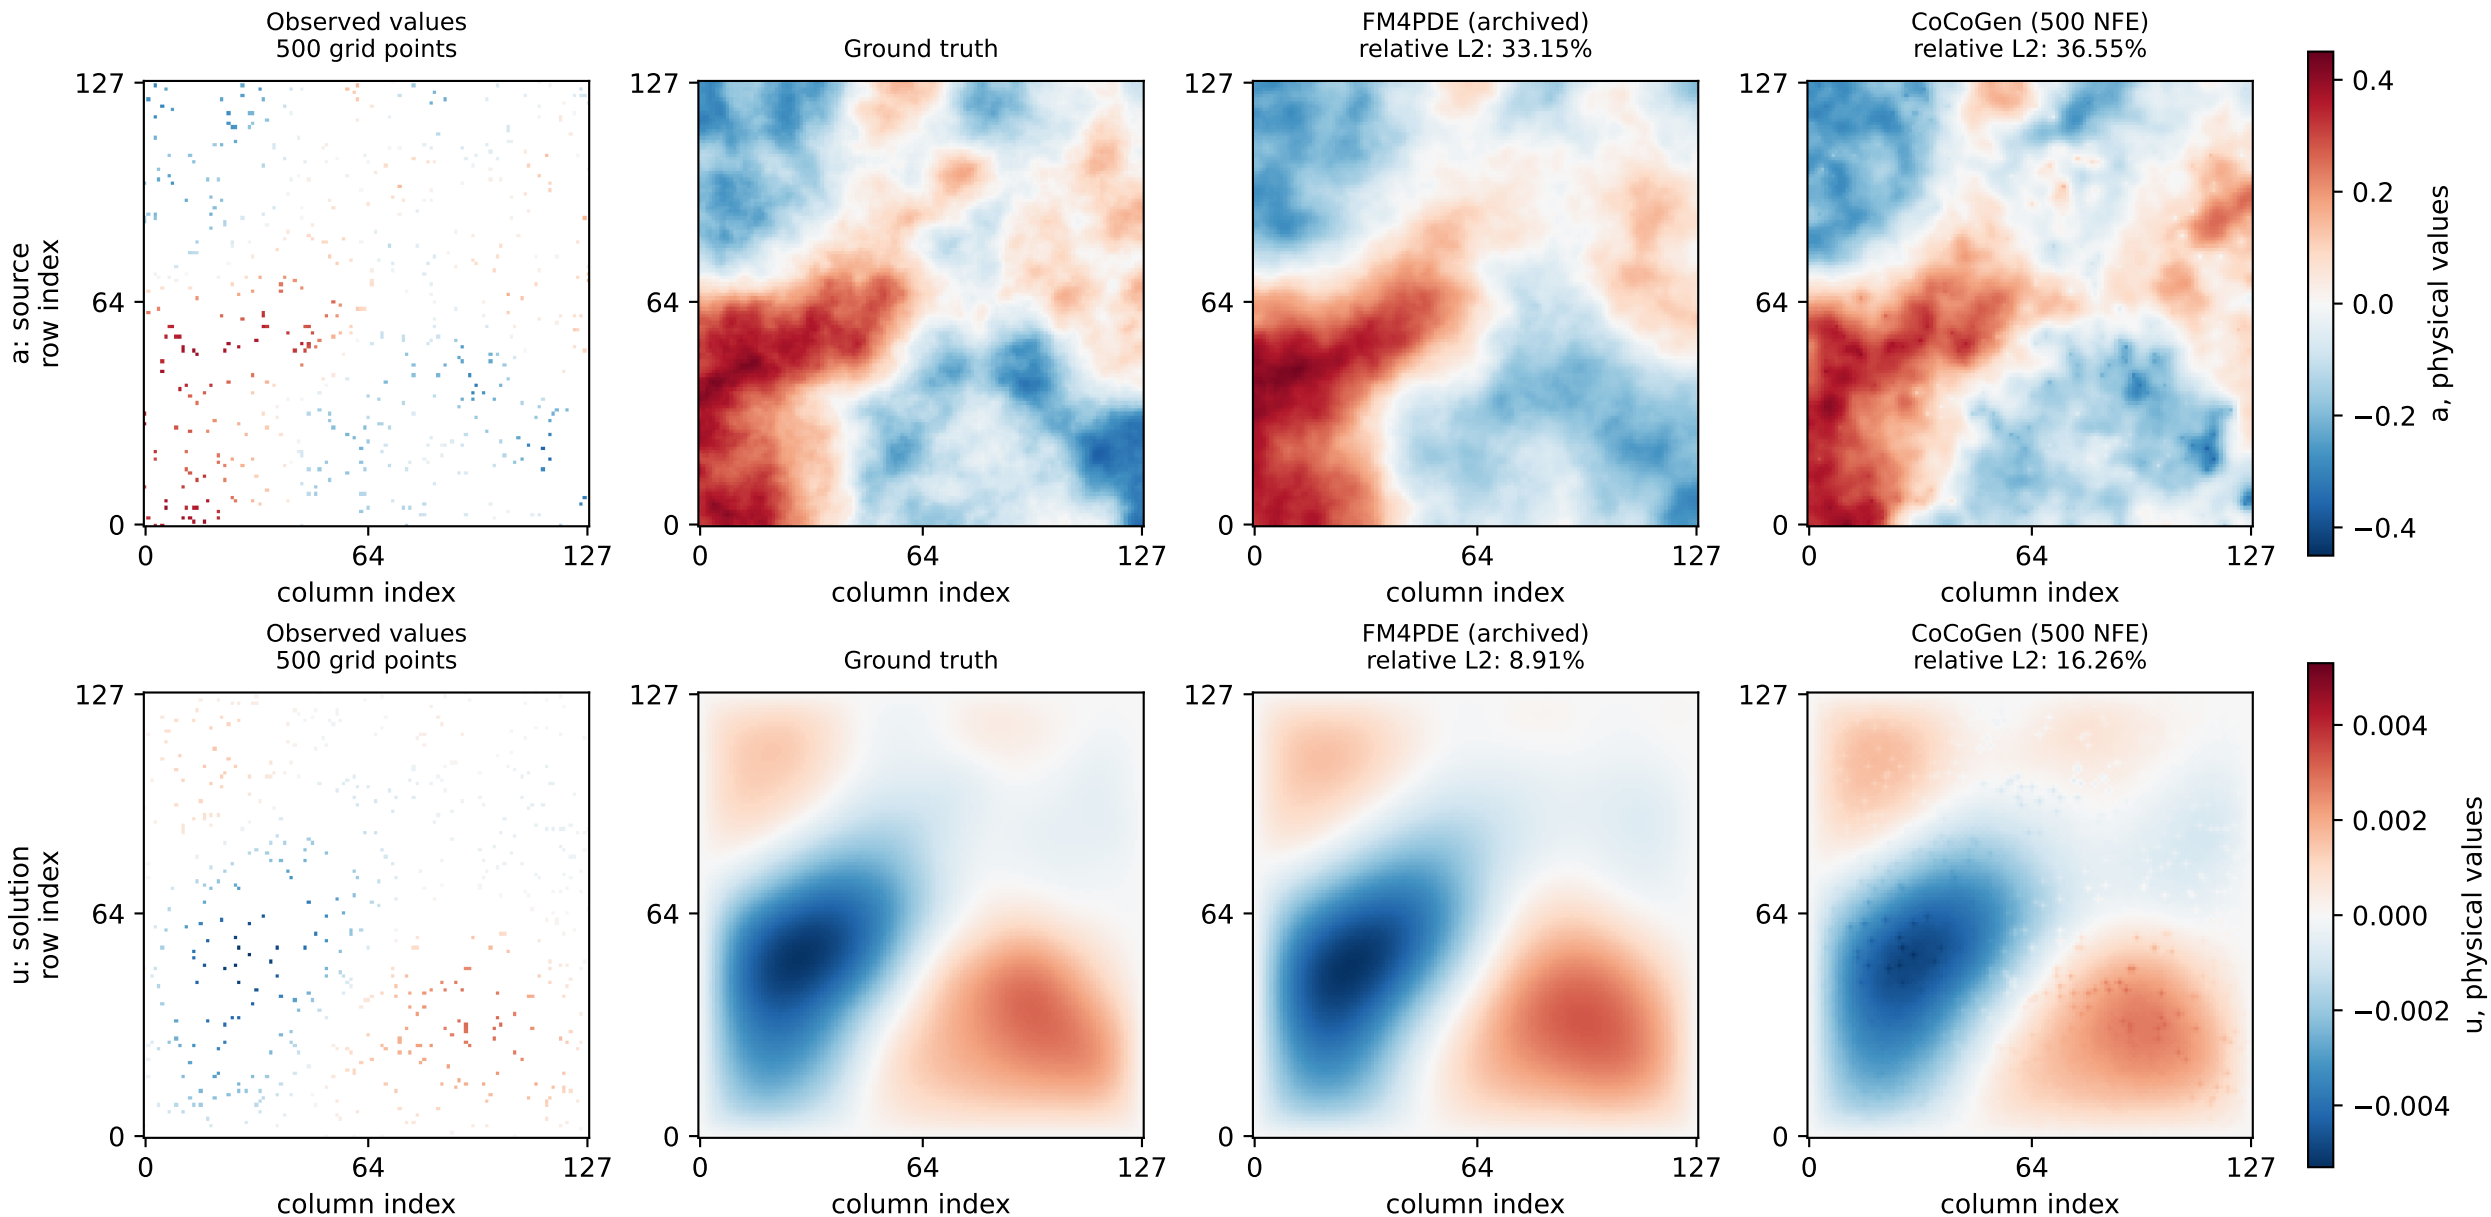

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Helmholtz / ID / Sparse inverse / sample 0

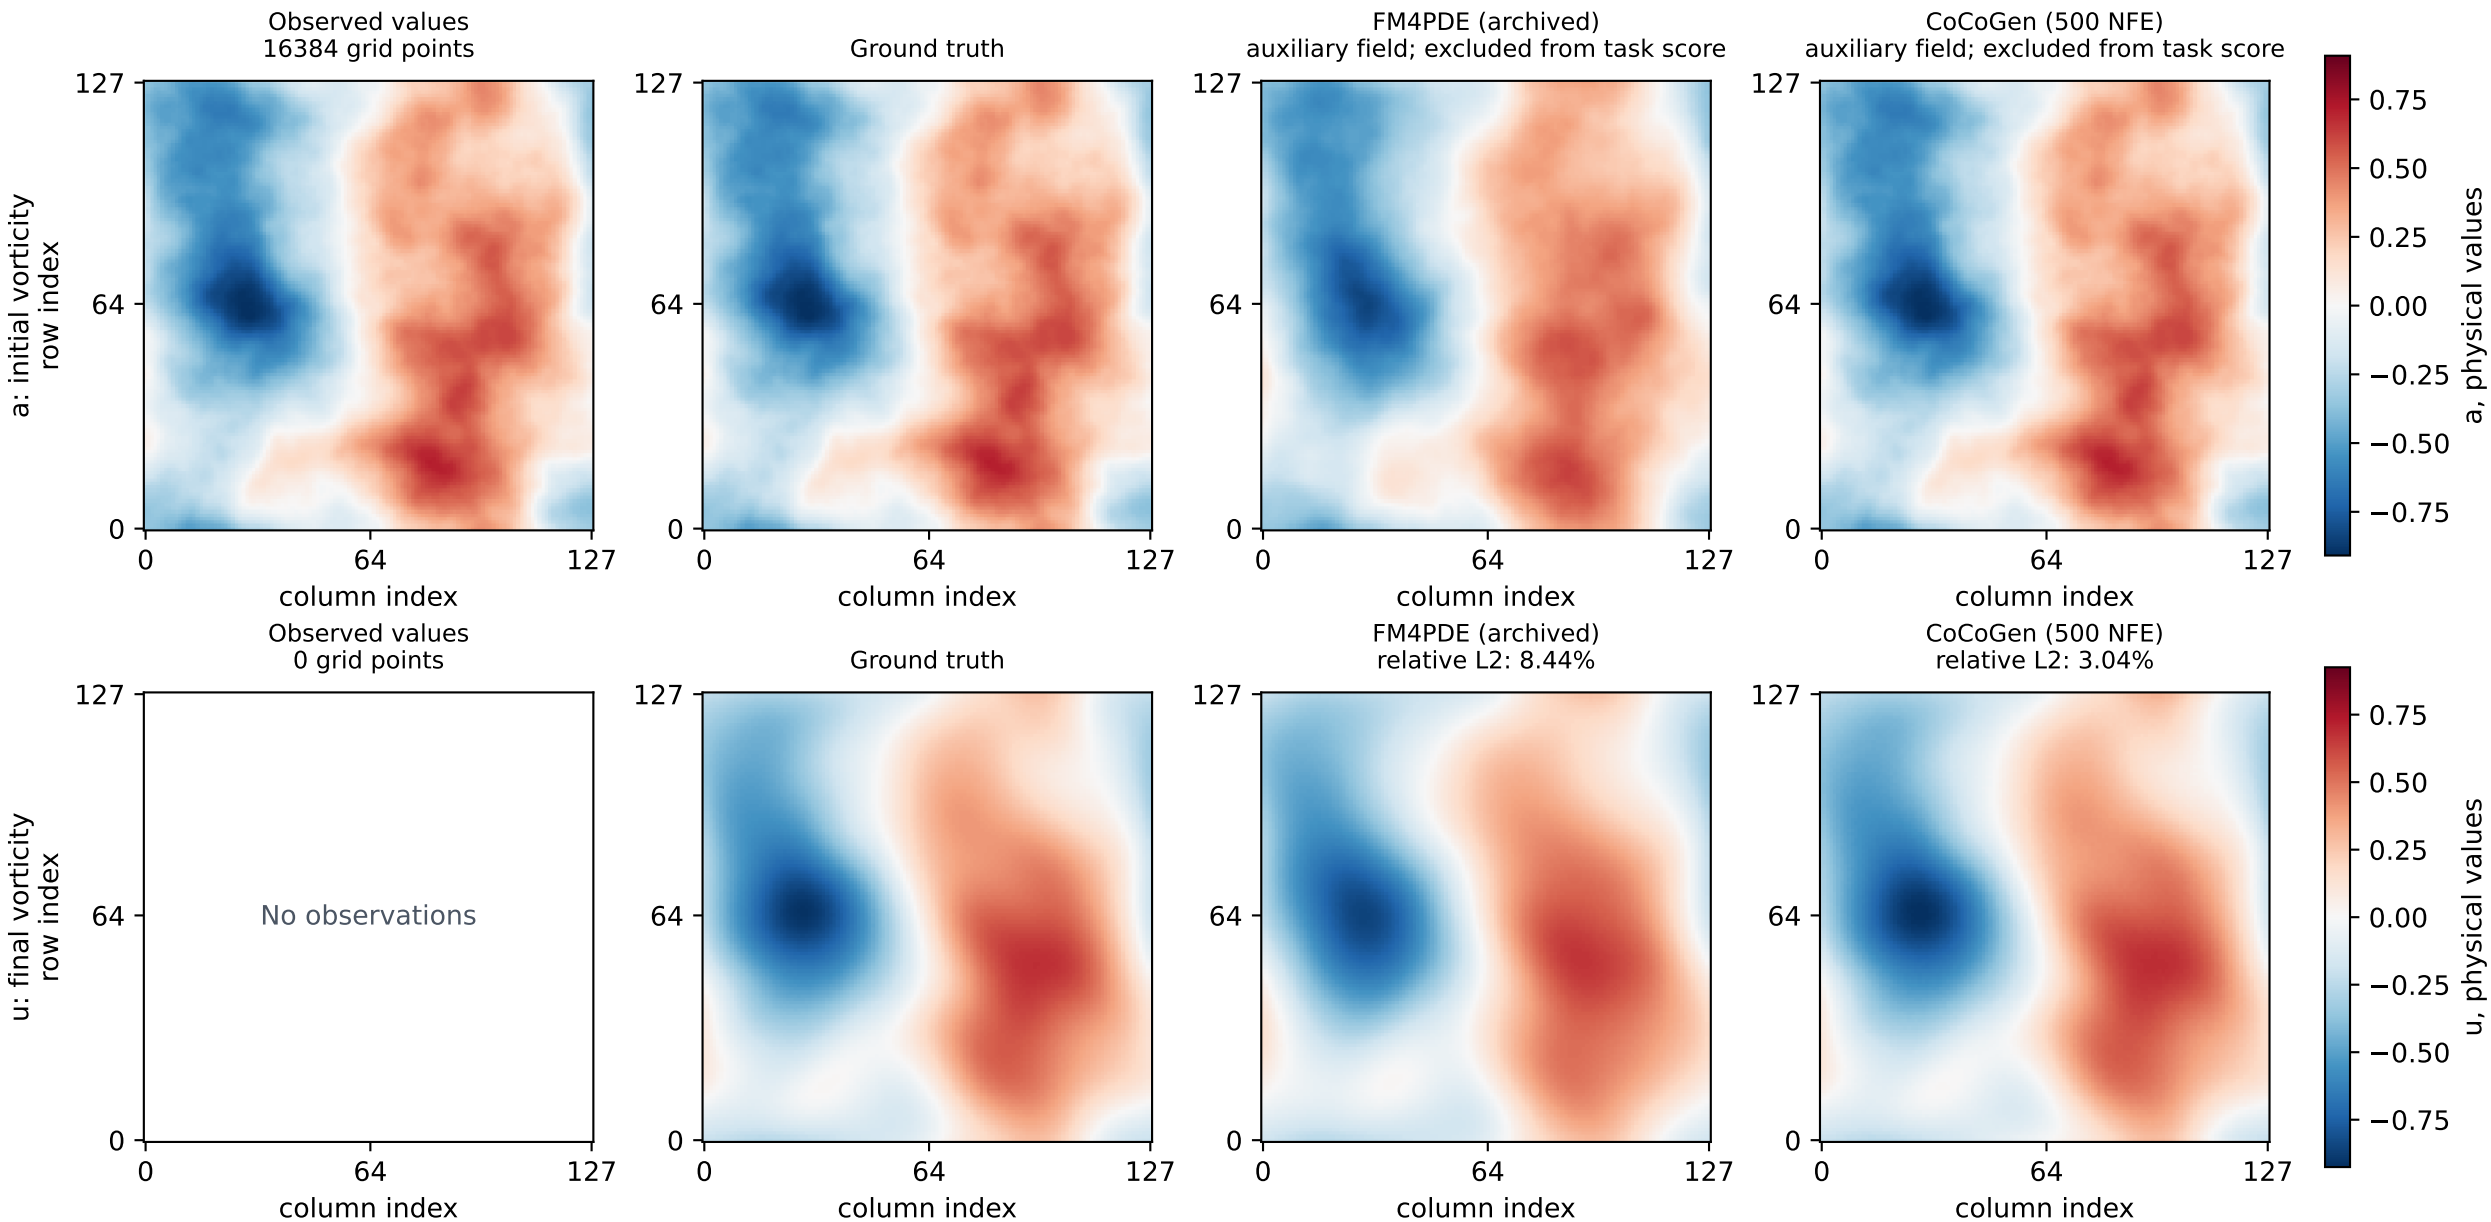

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Helmholtz / ID / Sparse joint reconstruction / sample 0

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
 Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.

Navier-Stokes / ID / Full-observation forward / sample 2000

First formal ID, chosen by index. Each panel is one example, not the 1,000-case mean.
Same ground truth and effective observations. Field color scales shared across each PDE's pages; no image interpolation.
